

New Standards Governance Process

Training for technical authors

Mariapia Angelino, WSP
Adam Hill, WSP

April 2021

New Standards Governance Process

Training for technical authors

Mariapia Angelino, WSP
Adam Hill, WSP

April 2021

Objectives for today

- Present the changes to governance of technical documents to accommodate major revisions and incremental changes (i.e. categories of change A/B/C/D)
- Present the new deliverables replacing those in the QMR system
- Present the new approach to consultation replacing the TPB, called Technical Standard Committee (TSC)
- Outline key changes made to Jira and CARS
- Present key responsibilities of the technical authors

Outcomes from today

- Understand the need for a new governance process and its benefits
- Understand your role in managing major revisions and incremental changes in the new governance process
- Understand how to compile the new governance deliverables
- Understand key changes to Jira and CARS and where to find additional information to use them
- Be ready to support the implementation of the new governance system

Agenda

- Introduction
- Session 1: Overview of the new Standards Governance Process
- Session 2: Categories of change A/B/C/D
- Session 3: Enhanced governance steps
- Session 4: Enhanced deliverables replacing QMR system
- Session 5: New consultation process replacing the TPB
- Session 6: Key responsibilities of technical authors
- Session 7: Key updates to Jira and CARS
- Conclusions and next steps

Introduction

1. Safety moment
2. Celebrating success
3. Approach to online course delivery
4. Why we are doing this

Stress awareness: **30 day challenge**

Safety moment

DMRB work programme: transformation in culture, tools and processes fuelled by digital innovation				
15,000 pages of old-style documents editorially reviewed, technically updated or withdrawal	394 old-style documents reviewed in 2.5 years	30 previous record number of DMRB documents revised in a year	272 new record of old-style documents replaced in a single year (2019) thanks to a digitalised workflow	155 new-style documents published at end of March 2020 - consistent style and format for the first time
40% reduction in DMRB page count	50% reduction in DMRB word count	60% reduction in departures applications	70% reduction in cost of drafting documents through on-line collaborative working	80% reduction in time taken to draft new documents
£19.5M historic cost to update 394 old-style documents	£11.6M actual cost to update 394 old-style documents	£7.5M savings in the cost of updating the DMRB – investment in TSES (£4.3M) completely recovered	£10M Savings in the cost of reviewing and processing departures per year	6 Modules of the TSES: CARS; Jira; DAS 3.0; Digital Library, Index Manager and Archive; Open API; website.

**Celebrating
success**

Approach to online course delivery

Introduction	
Session 1: Overview of the new Standards Governance Process	1
Session 2: Categories of change A/B/C/D	
Session 3: Enhanced governance steps	
b	
s	Please type your questions in the chat box
break	15 min
Session 5: New consultation process replacing the TPB	
Session 6: Key responsibilities of technical authors	3
Session 7: Key updates to Jira and CARS	
Conclusions and next steps	

Why we are doing this: imperative

- After the successful delivery of the Future DMRB in RIS 1, now in RIS 2 Highways England has an obligation to keep the DMRB up to date (this is a **RIS 2 License requirement**).
 - A new streamlined governance process is essential to complete the evolution of the DMRB efficiently and effectively.
 - It will also be relevant to update the MCHW in parallel and subsequently keep the MCHW up to date after its overall refresh.

Why we are doing this: highly desirable

- Governance of document development is considered a cumbersome and unduly bureaucratic process:
 - The process can be disproportionate to the type of changes being made to technical documents.
 - Many stakeholders involved and sometimes unclear expectations on their contribution.
 - QMR governance deliverables to be produced at set milestones with some duplication of effort and content.

Please go to Menti www.menti.com

Approach to online course delivery

Introduction	
Session 1: Overview of the new Standards Governance Process	1
Session 2: Categories of change A/B/C/D	
Session 3: Enhanced governance steps	
<i>break</i>	15 min
Session 4: Enhanced deliverables replacing QMR system	2
<i>break</i>	15 min
Session 5: New consultation process replacing the TPB	
Session 6: Key responsibilities of technical authors	3
Session 7: Key updates to Jira and CARS	
Conclusions and next steps	

Session 1: Overview of the new Standards Governance Process

1. Role of governance for Technical Standards
2. Principles for the new governance system
3. Overview of key changes
4. New terms

Role of governance for Technical Standards

Technical standards need to:

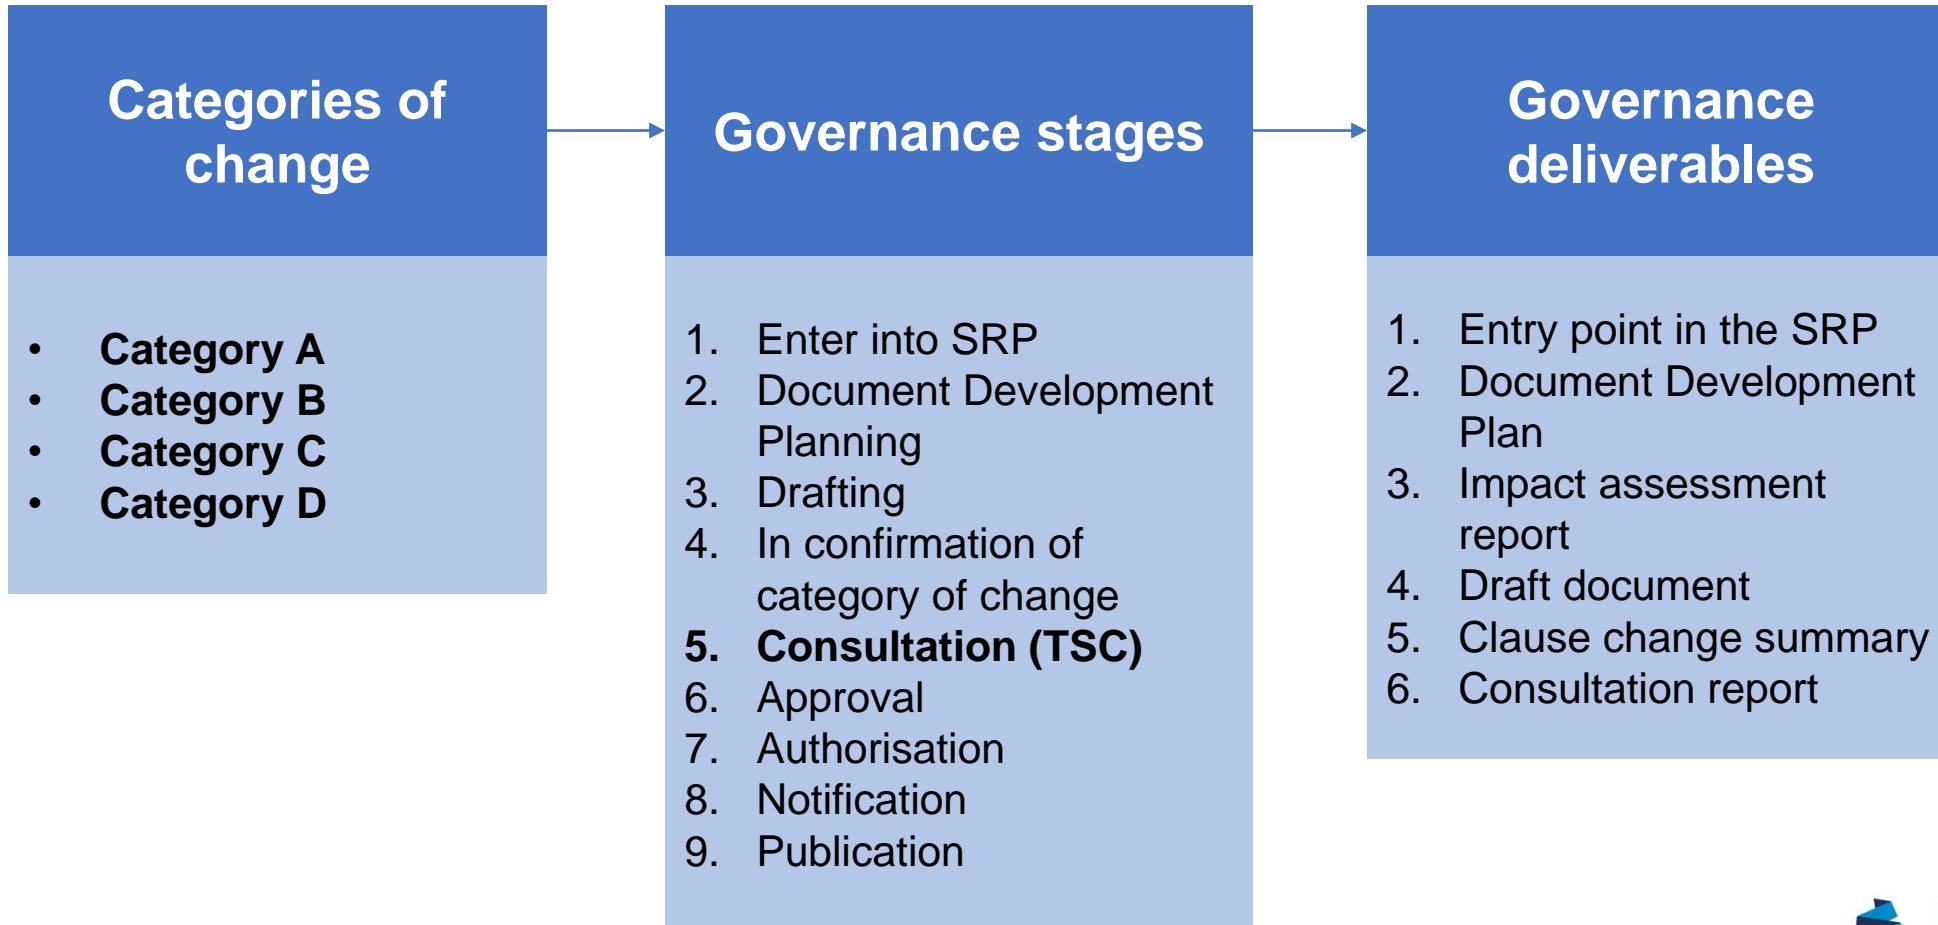

- be technically correct and compatible with other standards
- be compatible with the policies and objectives of the entire business (and the Devolved Administrations)
- have evidence that due diligence has been applied to the technical decision making and a rationale for why requirements and advice has been introduced

Principles for the new governance process

The new governance process will:

1. help the Overseeing Organisations to **fulfil their obligations and manage their risks**;
2. support technical standards **remaining up to date**, not provide a blocker;
3. be **proportionate to the changes** being introduced whilst being more robust;
4. have **deliverables produced at the right time** in the process with any duplication of information avoided;
5. have **consultation** for any technical change prior to approval to publish;
6. capture the **rationale and justification** for any changes with a record of who was involved in decision making.

Overview of key changes and what will be covered today

New terms

Term in the old governance process	Corresponding term in the new governance process
Technical Project Board (TPB)	Technical Standards Committee (TSC)
Technical Project Board (TPB) chair	Technical Standards Committee (TSC) chair
Technical Project Board (TPB) secretary	Technical Standards Committee (TSC) secretary
Document owner	Technical author
Standards Forward Programme (SFP) <i>current workflow</i>	Standards Review Programme (SRP)

Approach to online course delivery

Introduction	
Session 1: Overview of the new Standards Governance Process	1
Session 2: Categories of change A/B/C/D	
Session 3: Enhanced governance steps	
<i>break</i>	15 min
Session 4: Enhanced deliverables replacing QMR system	2
<i>break</i>	15 min
Session 5: New consultation process replacing the TPB	
Session 6: Key responsibilities of technical authors	3
Session 7: Key updates to Jira and CARS	
Conclusions and next steps	

Session 2: Categories of change A/B/C/D

Categories of change (1/2)

Major revision		Incremental change		
Category	A. Policy Change / Rewrite / New document development	B. Change to requirement	C. Change to advice	D. Change to notes and spelling corrections
	<ul style="list-style-type: none">• New technical policy• Rewrite of the document• Development of new document	Requirements (shall)	Advice (should, may)	Notes and spelling mistakes (changes that do not affect requirements or advice content)

Categories of change (2/2)

- The technical author proposes the category of change at the start of the process.
- TSC chair assigns the category of changes in Jira based on the proposal made.
- The category will be confirmed at a specific stage of the governance process ('confirmation of category of change', see next slides).
- When there are multiple changes to be made, the category chosen shall be the most onerous.

The choice of the category of change affects the governance steps that will be followed (see Session 3) and the version numbering of the published document (see next few slides).

New document version numbering

Governance Level	A. Policy Change / Rewrite/ Development new document	B. Change to requirement	C. Change to advice	D. Change to notes and spelling mistakes
Document version number	1.0.0	0.1.0	0.0.1	0.0.1

Example:

CS 455 2.0.0

CS 455 1.1.0

CS 455 1.0.1

CS 455 1.0.0

- 3-digit number following the document code and number
- Version number linked to the type of change
- Child-parent relationship for version number; re-baseline when the number goes up

Release notes

- Release notes will be reformatted to help users understand the type of changes made to a document (and the associated version numbering system)
- The revision history will also be included.

CD 345 Version 1.1.0		Release notes									
Latest release notes

Q1-Q4: Please go to Menti www.menti.com

Approach to online course delivery

Introduction	
Session 1: Overview of the new Standards Governance Process	1
Session 2: Categories of change A/B/C/D	
Session 3: Enhanced governance steps	
<i>break</i>	15 min
Session 4: Enhanced deliverables replacing QMR system	2
<i>break</i>	15 min
Session 5: New consultation process replacing the TPB	
Session 6: Key responsibilities of technical authors	3
Session 7: Key updates to Jira and CARS	
Conclusions and next steps	

Session 3: Enhanced governance steps

Objectives of the enhanced governance steps

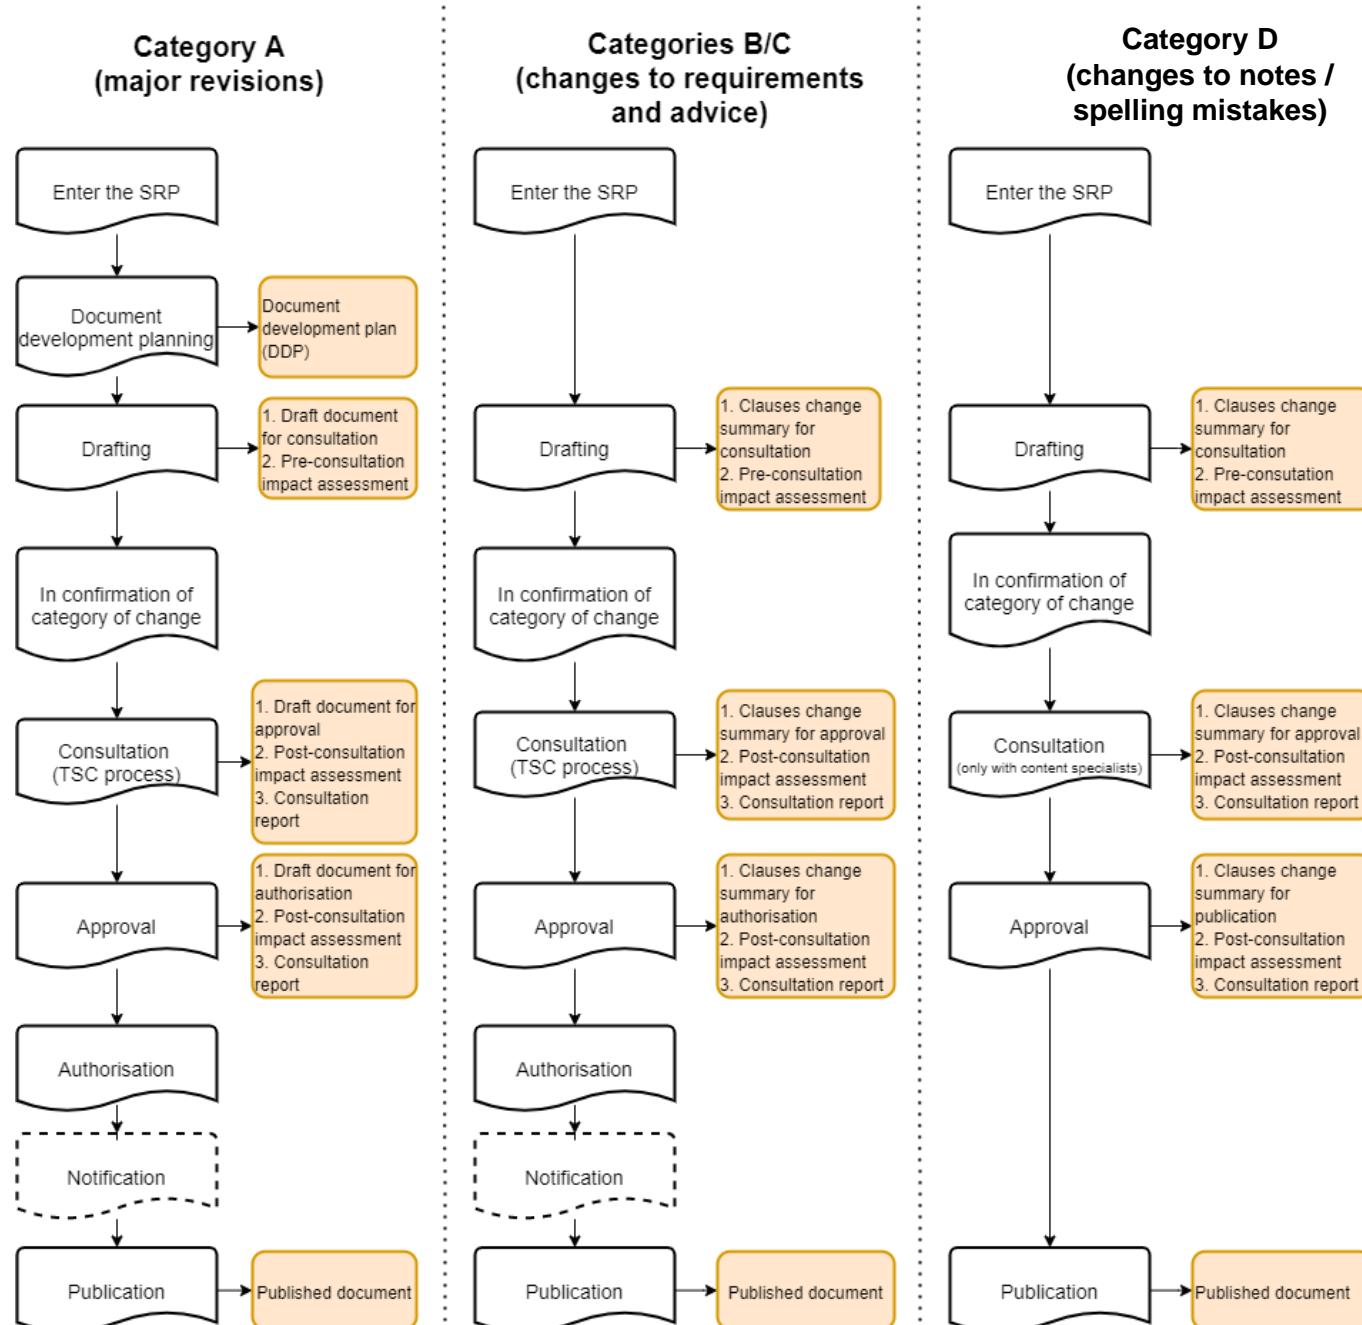

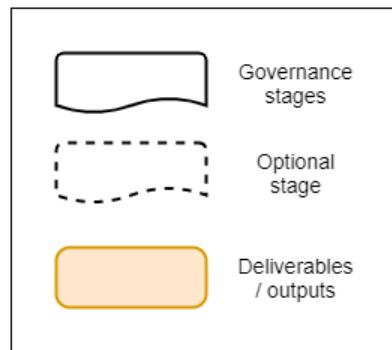

Apply a proportionate approach to the level of governance required

Avoid unnecessary / wasteful processes

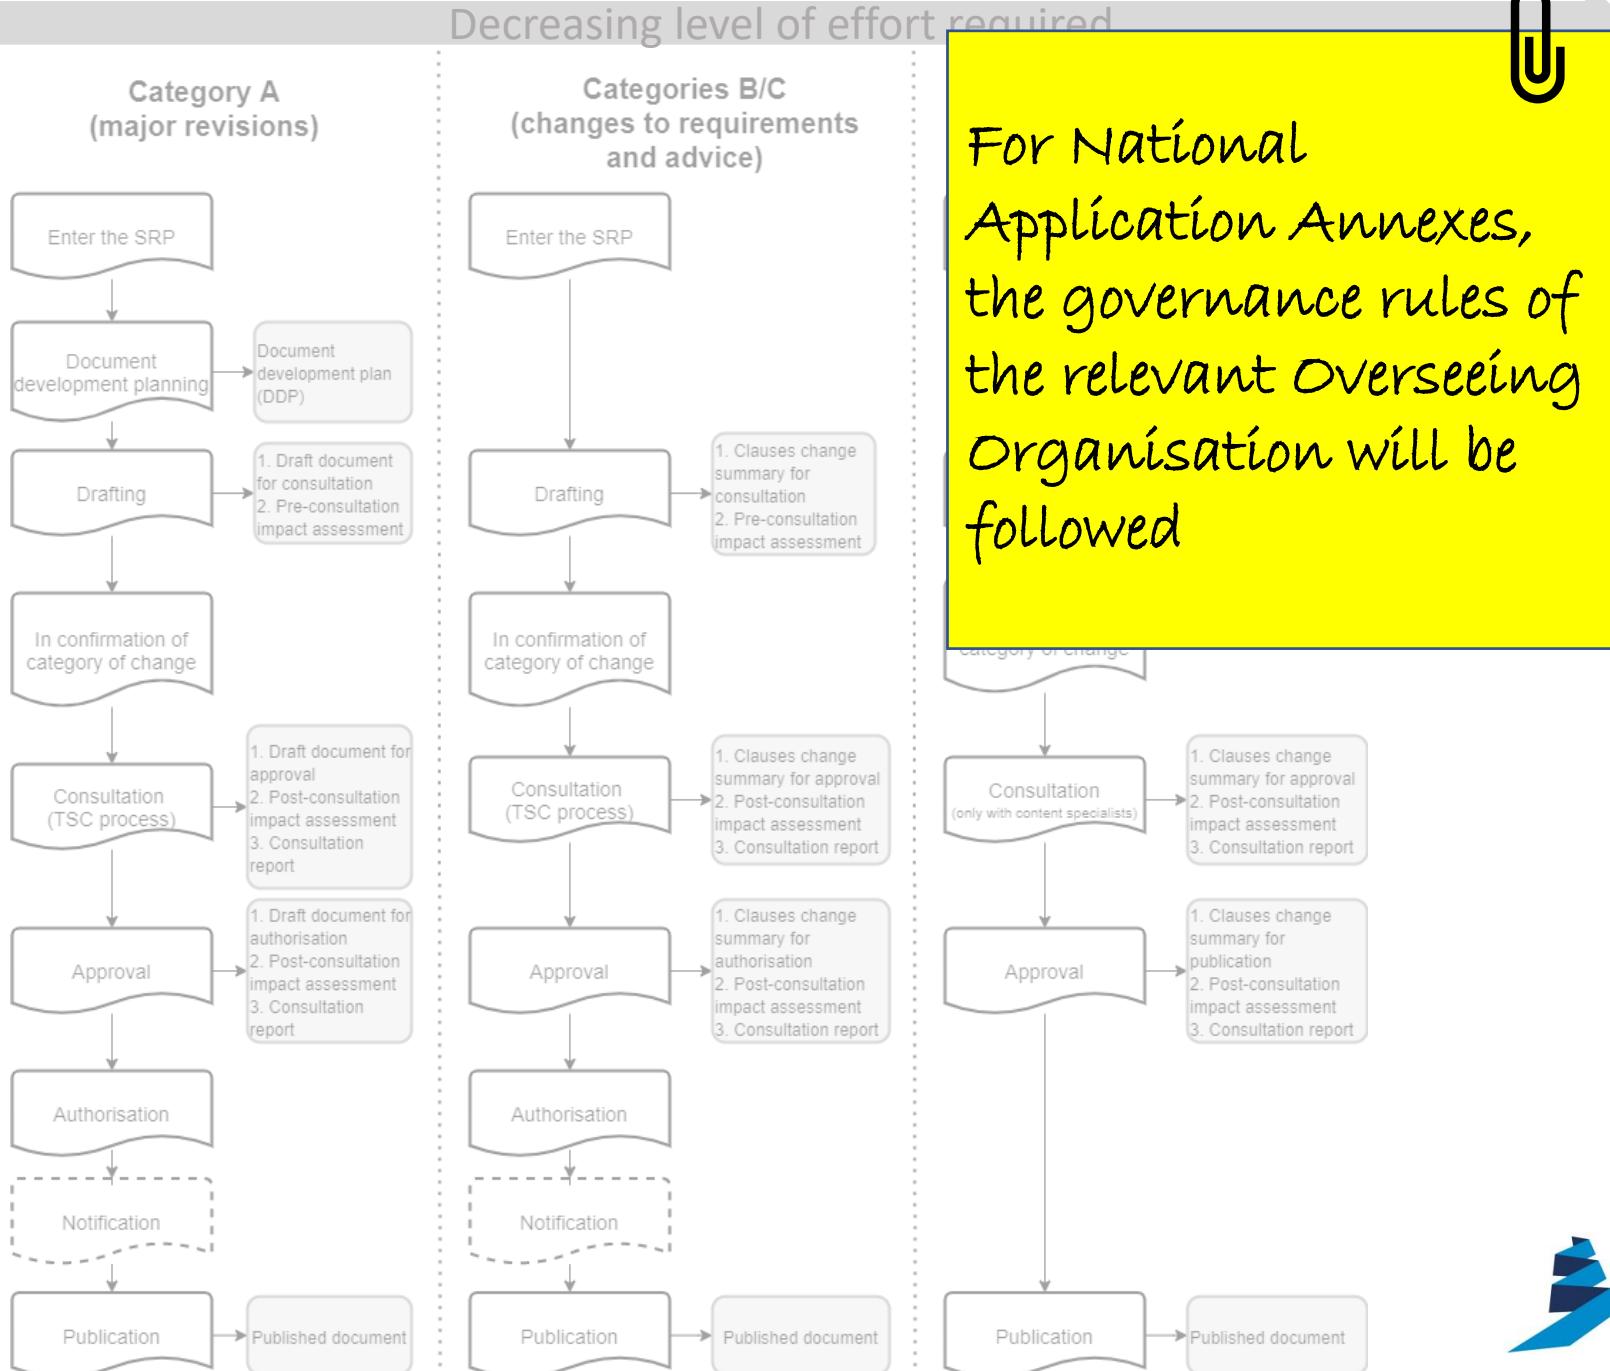

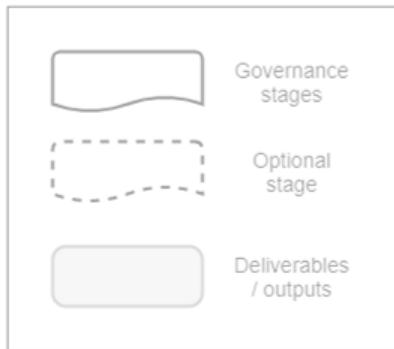

Enhanced governance steps

Decreasing level of effort required

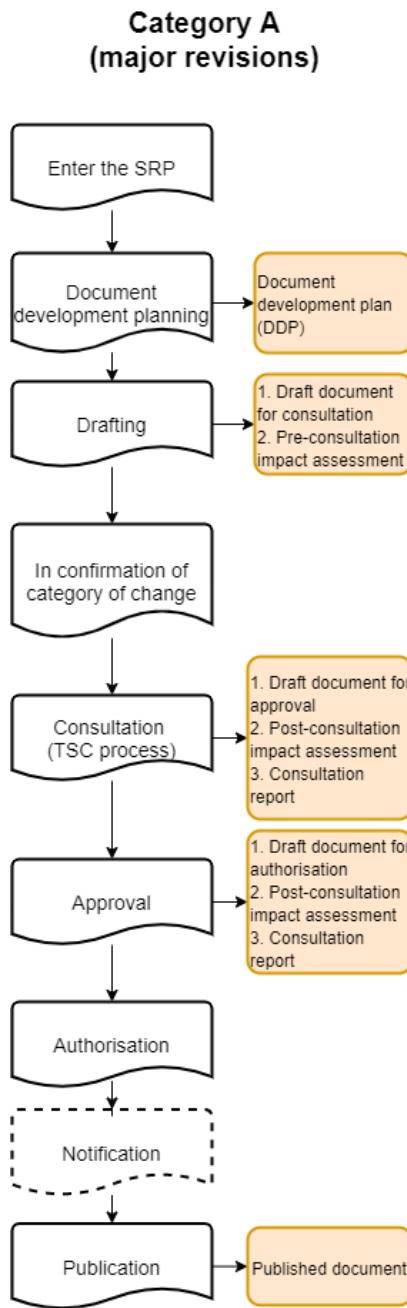

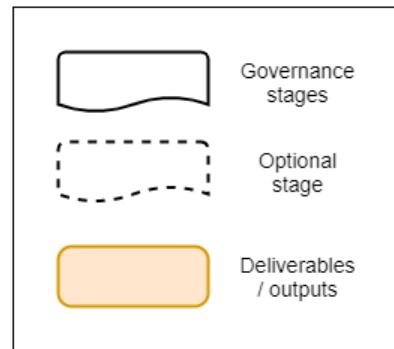

All stages processed using Jira workflow functionality

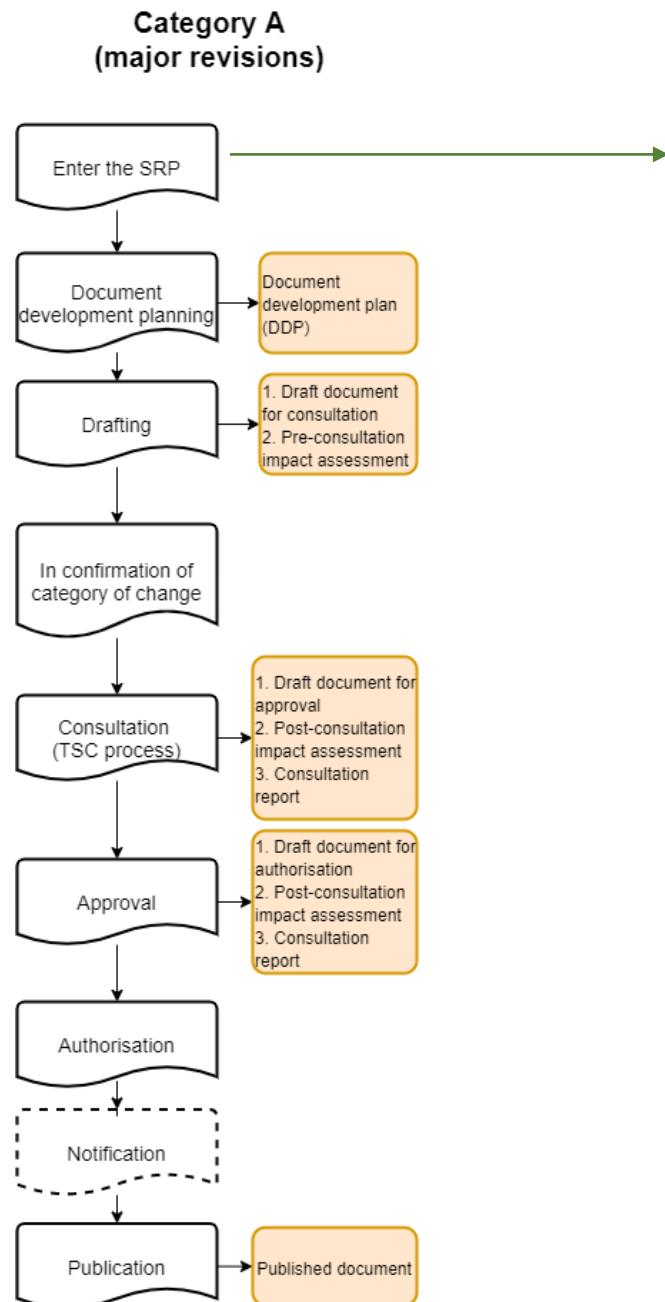

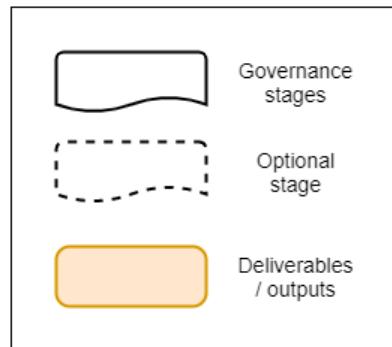

Enhanced governance steps

Enhanced governance steps

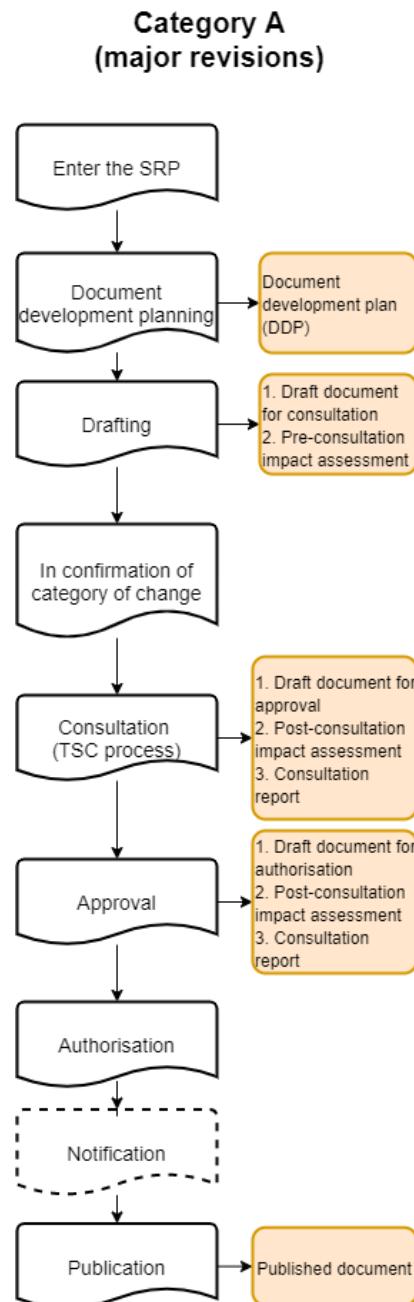

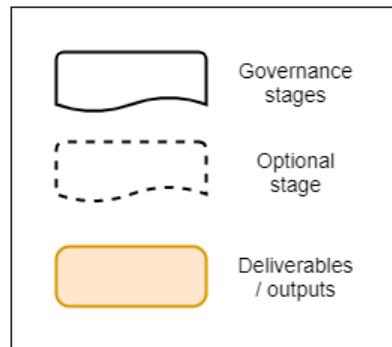

Enhanced governance steps

- **Technical author** requests the creation of a Jira item (**entry point in the SRP**) to TAGG
- **TAGG** creates Jira item on request
- **Technical author** completes the new Jira item, including proposed category of change
- **TSC chair** reviews the new Jira item, then submits for addition to SRP backlog
- **TAGG** undertakes assurance check and confirm document in SRP backlog

QMR1 no longer needed

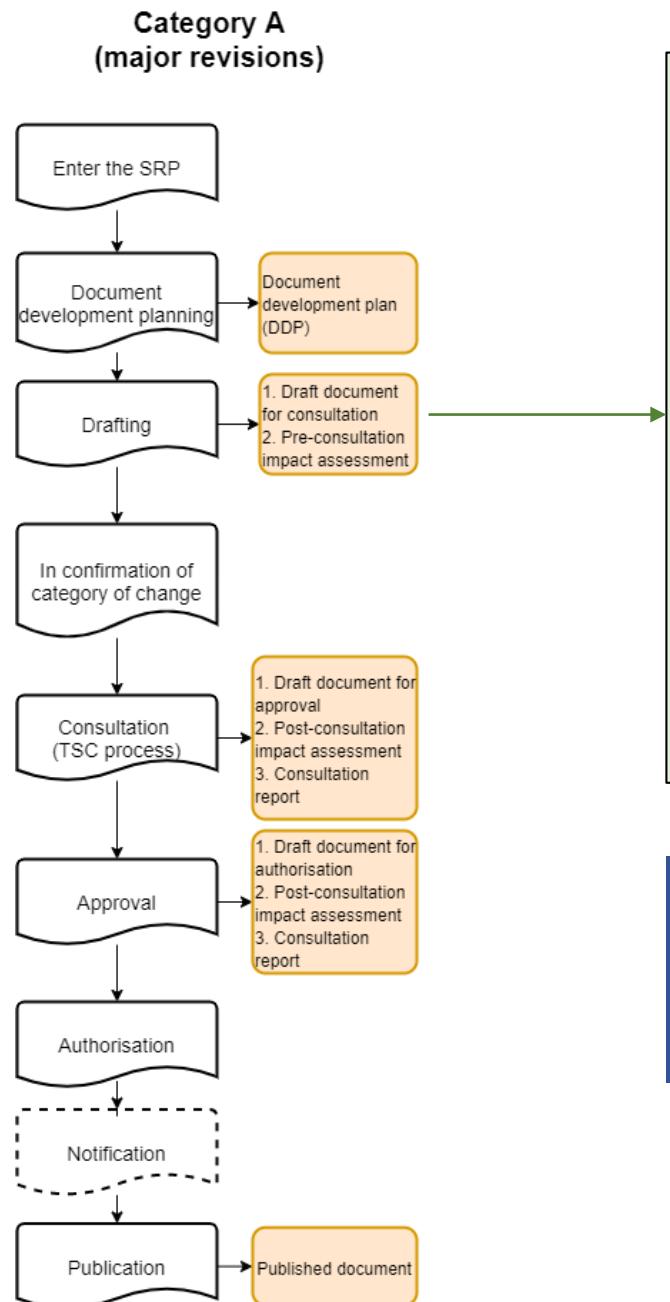

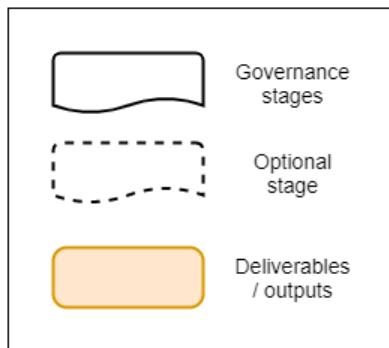

Enhanced governance steps

- **Technical author** develops the **Document Development Plan**.
- Once ready, the **Technical author** will add a SharePoint link to the DDP into Jira (see session 7).
- **TSC chair** reviews the DDP and confirms it is ready to be shared with TSC consultees.
- DDP notified to all TSC consultees using Jira.

DDP mandatory for cat. A only

Enhanced governance steps

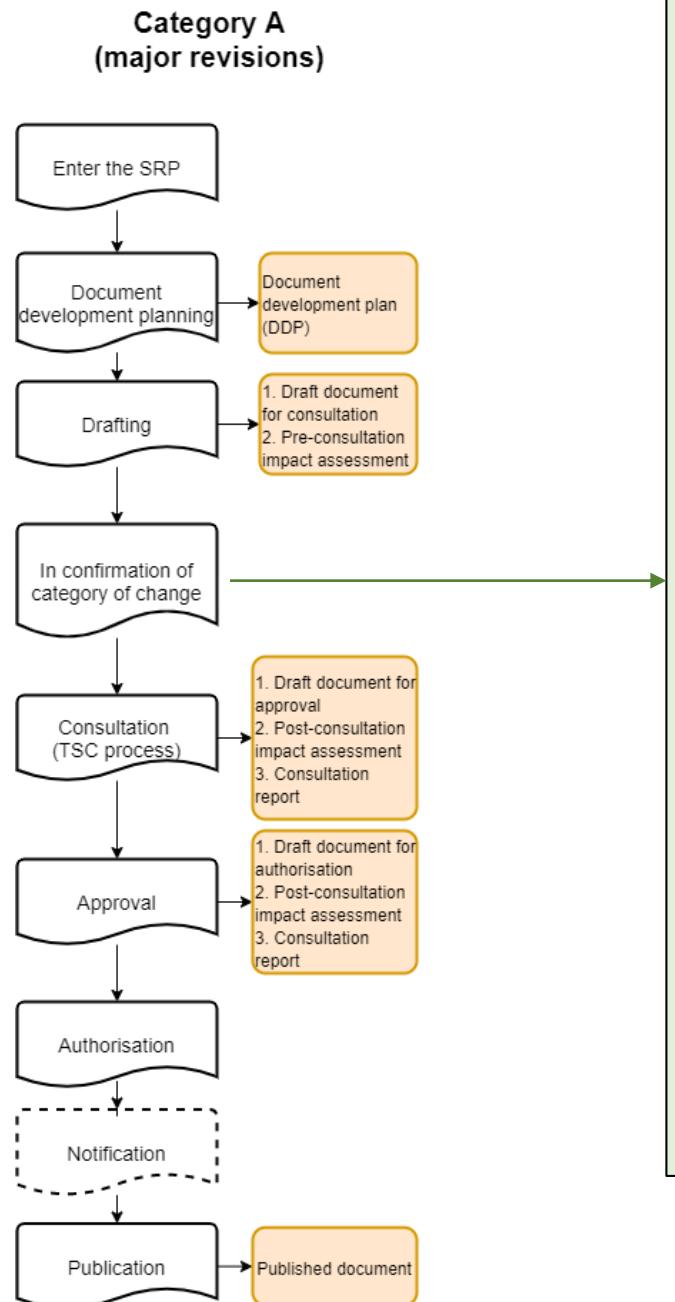

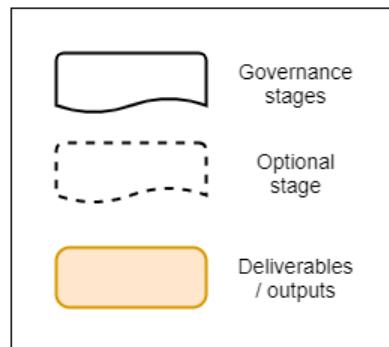

Technical author:

- starts drafting the document,
- engages with content specialists for progressive assurance,
- shares document with peer reviewers (at least once)
- updates **draft document for consultation** based on feedback received
- develops **pre-consultation impact assessment report**

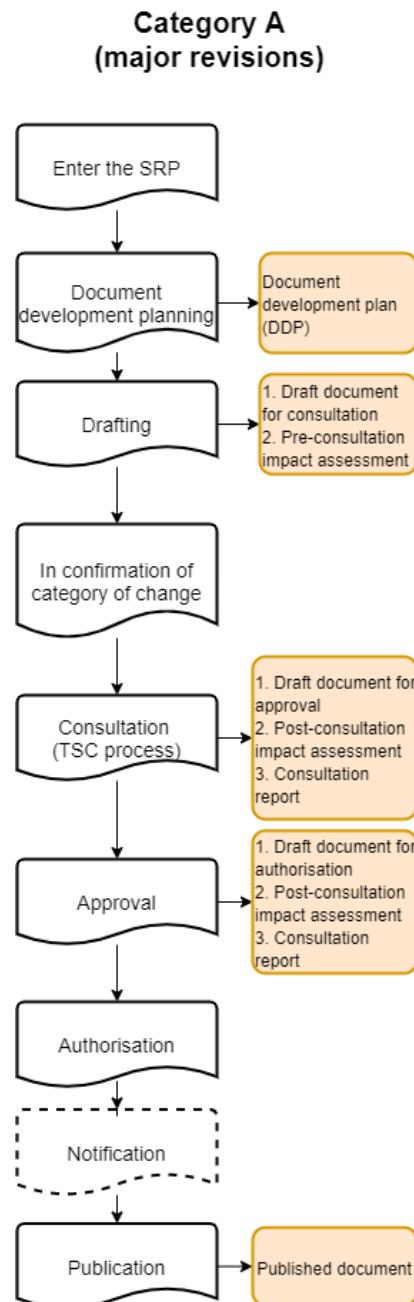

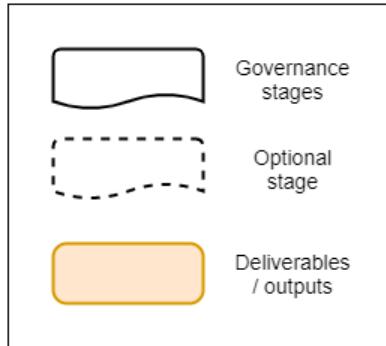

New impact assessment replacing QMR

Enhanced governance steps

- TSC chair:**
 - reviews **draft document** and **pre-consultation impact assessment report** for confirmation of category of change;
 - once satisfied, confirms category of change
- TAGG:**
 - review draft document and pre-consultation impact assessment report for confirmation of category of change;
 - discuss any concerns with TSC chair;
 - once satisfied, confirms category of change
- TSC chair** confirms the draft document and impact assessment report are ready to be shared with TSC consultees

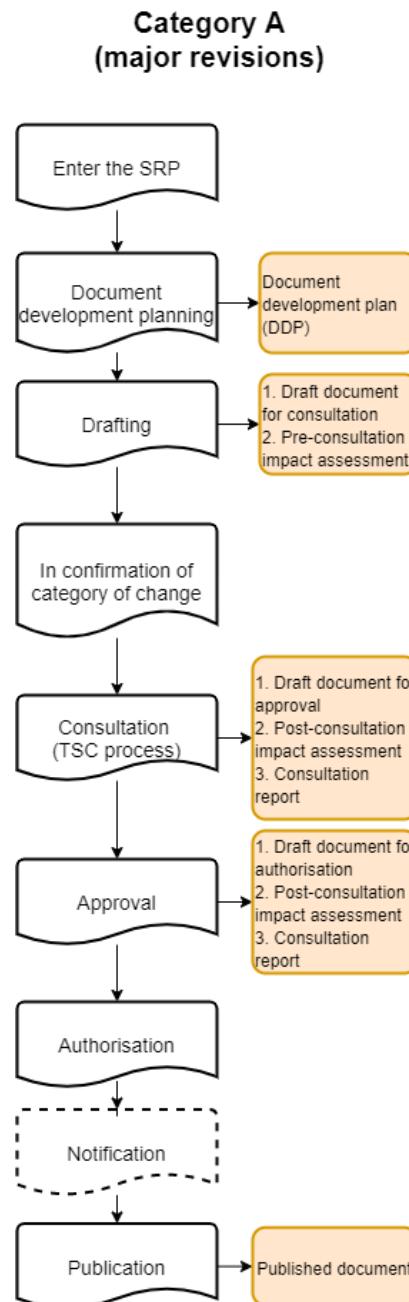

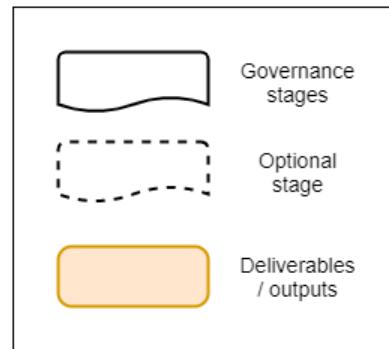

Enhanced governance steps

- **TSC chair** leads the consultation (see session 5)
- **TSC consultees** review the documents and provide relevant comments within the set timescale
- At the end of the consultation, **technical author** reviews comments received and updates the documents accordingly
- **Technical author** and **TSC chair** discusses the need for another consultation
- The **technical author** prepares the following for approval:
 - **draft document for approval**
 - **post-consultation impact assessment report**
 - **consultation report**
 - **clause change summary**
 - **change log** (for the future MCHW programme only);

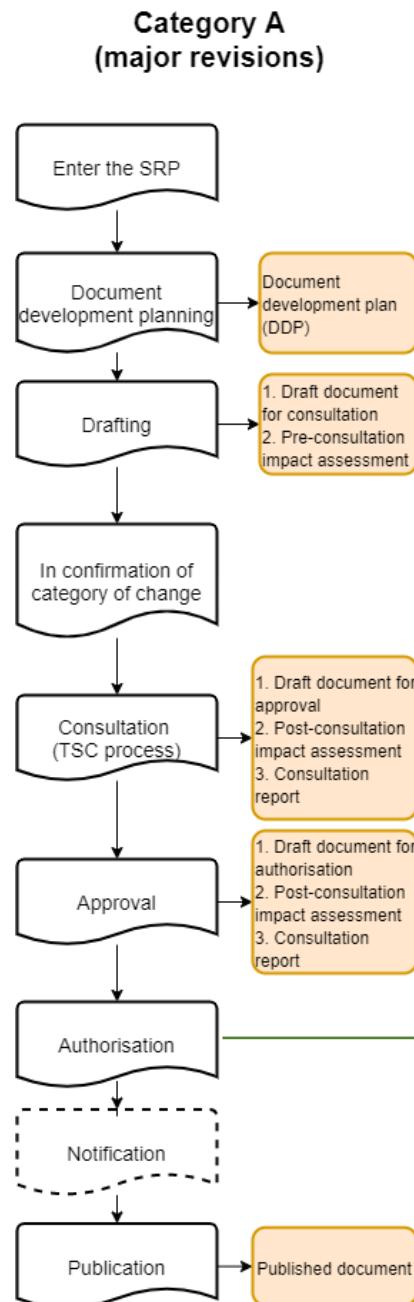

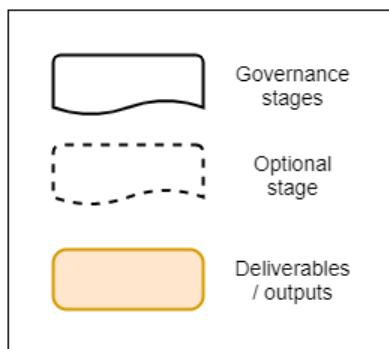

Enhanced governance steps

QMR2 replaced entirely

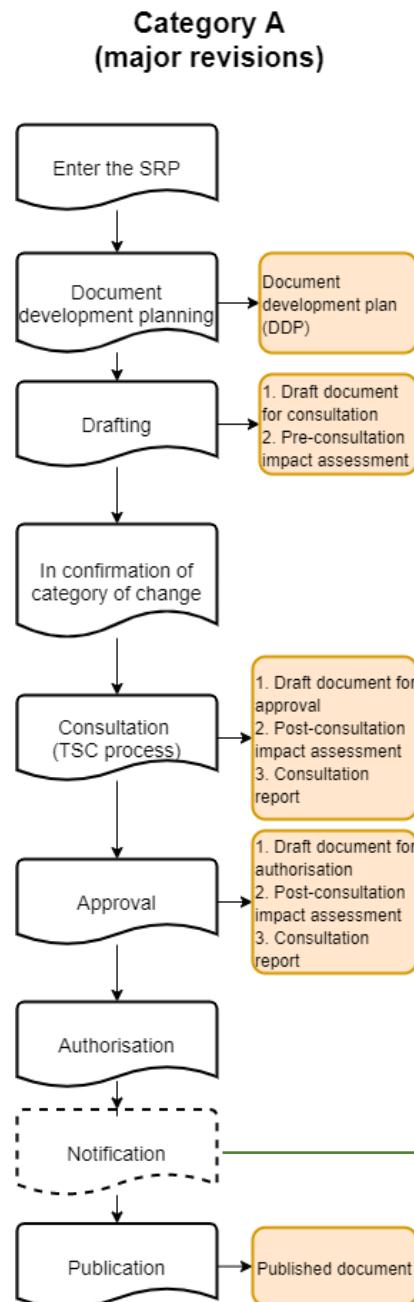

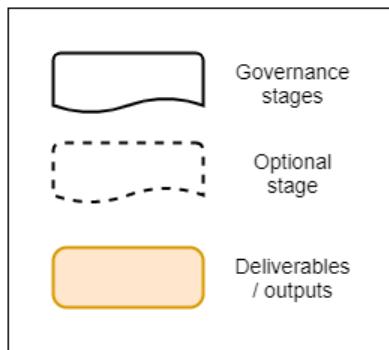

- **TSC chair** reviews:
 - **draft document**
 - **impact assessment report**
 - **consultation report**
 - **clause change summary**
 - **change log** (for the future MCHW programme only)
- If satisfied, approves it
- **Content specialist** reviews the draft document for MDD compliance and the impact assessment and consultation reports for completeness
- **Divisional Director** reviews documentation and, if satisfied, approves it
- **Heads of Standards** of the Overseeing Organisations review the documentation and, if satisfied, approve it

Enhanced governance steps

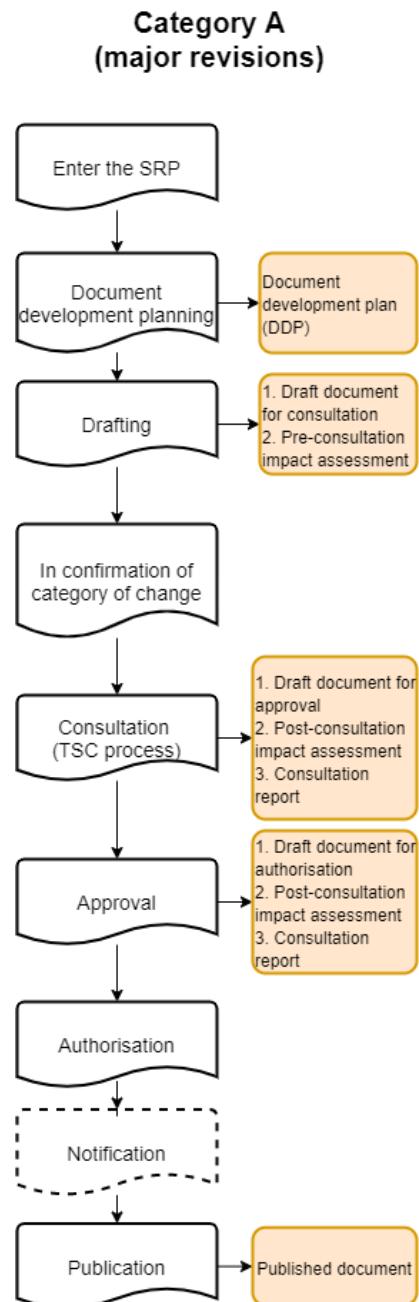

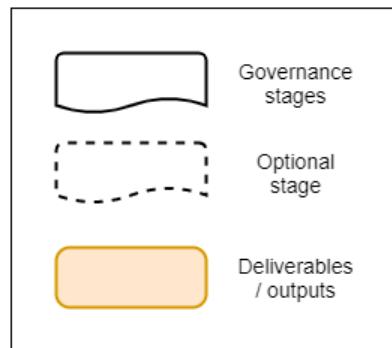

- **HE CHE** reviews documentation and, if satisfied, authorises it
- If authorisation from the other overseeing organisations is needed, their **CHEs** review documentation and, if satisfied, authorise it

Enhanced governance steps

- **TAGG** manages notification process
- **Technical author** works with TAGG to address EC comments and updates the document accordingly

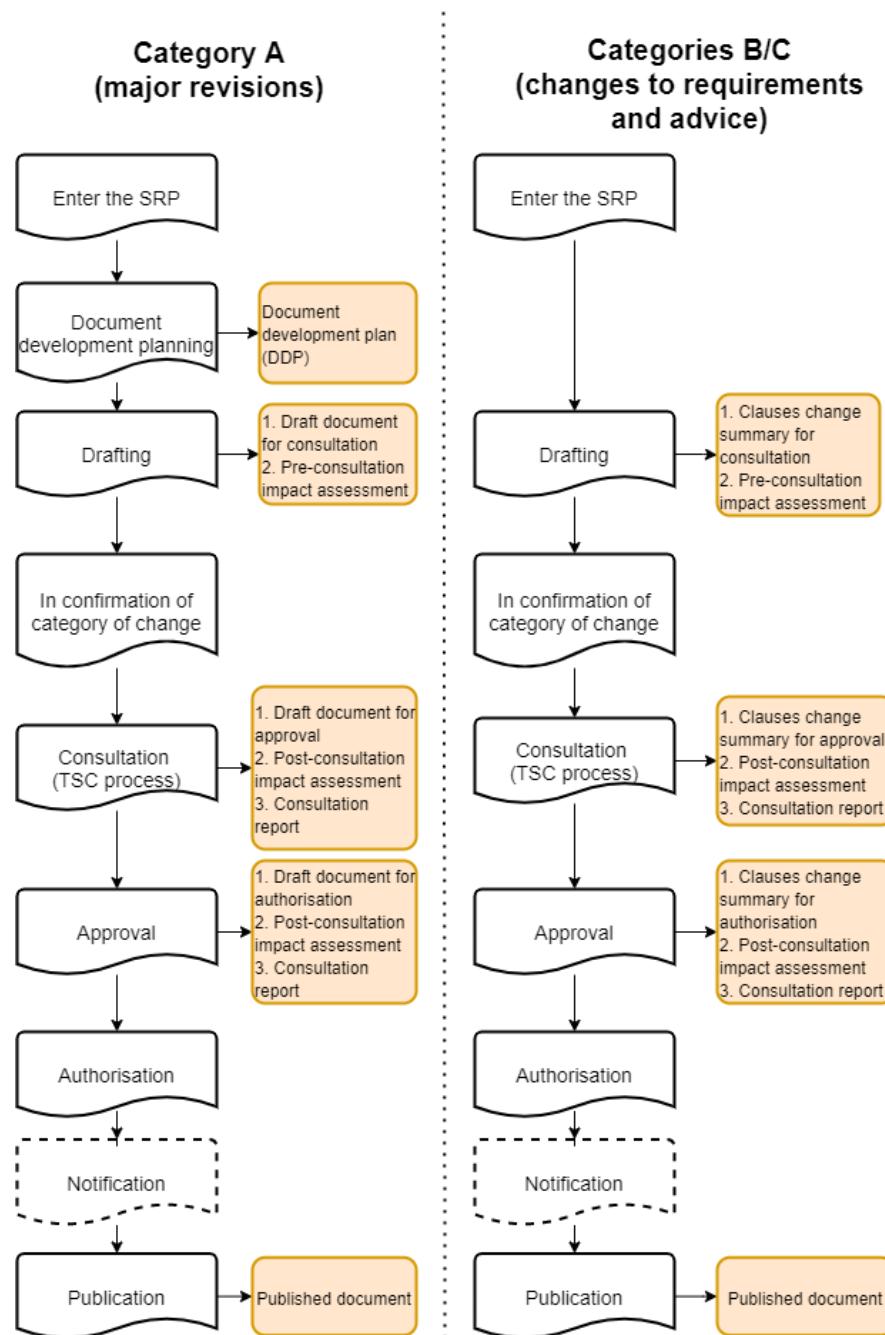

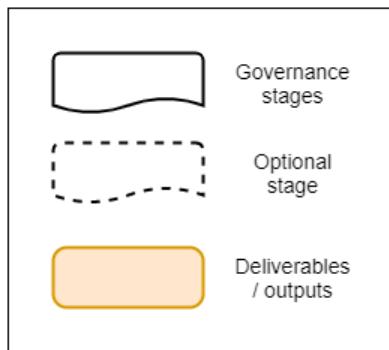

Enhanced governance steps

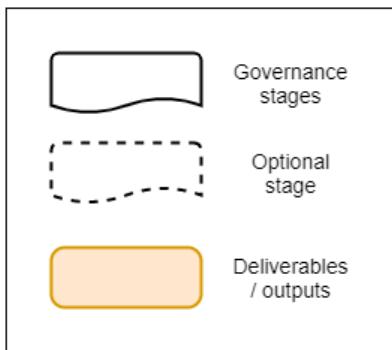

- **TAGG** manages publication process
- No content / technical changes, further edits or amendments shall be made once a document passes CHE sign off(s)

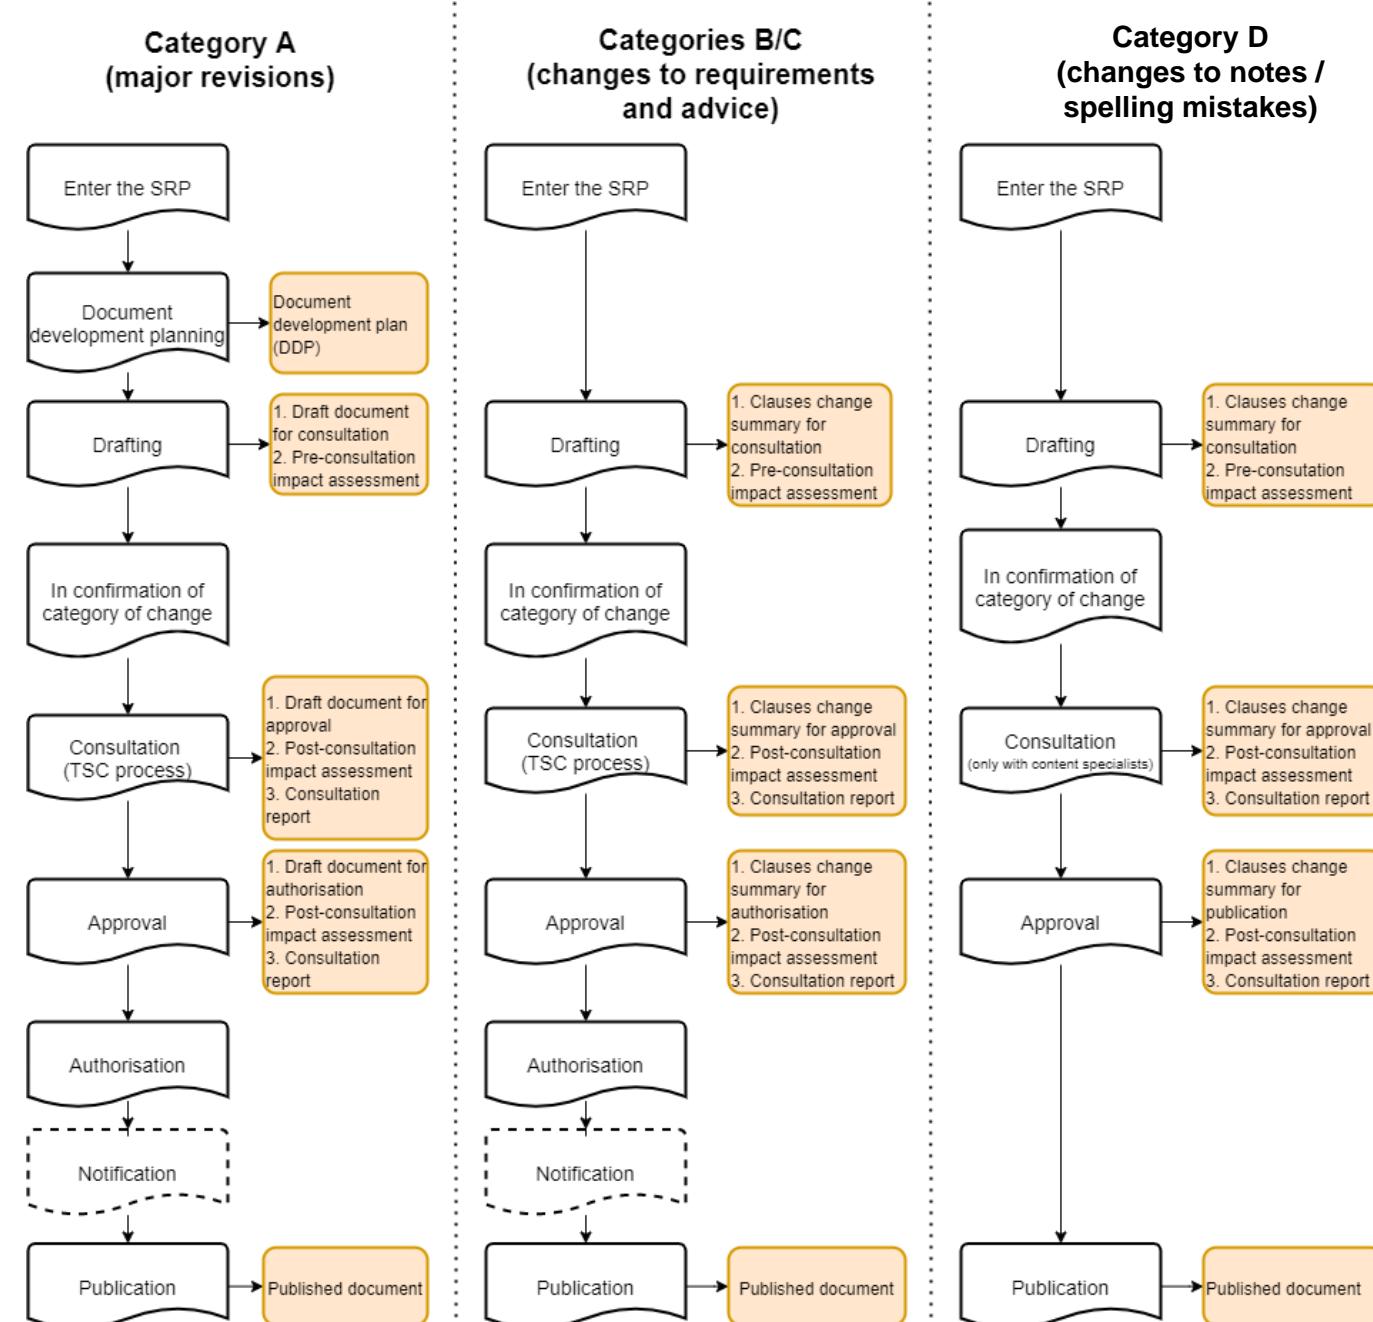

Enhanced governance steps

Enhanced governance steps

Decreasing level of effort required

Key differences with cat. A

Same as categories B/C:

- No DDP
- Drafting at clause level, not document level
- No Divisional Director approval

Additional differences:

- Consultation with content specialists only
- No authorisation
- No notification

Q5-Q11: Please go to Menti www.menti.com

Break (15 min)

Approach to online course delivery

Introduction	
Session 1: Overview of the new Standards Governance Process	1
Session 2: Categories of change A/B/C/D	
Session 3: Enhanced governance steps	
<i>break</i>	15 min
Session 4: Enhanced deliverables replacing QMR system	2
<i>break</i>	15 min
Session 5: New consultation process replacing the TPB	
Session 6: Key responsibilities of technical authors	3
Session 7: Key updates to Jira and CARS	
Conclusions and next steps	

Session 4: Enhanced deliverables replacing QMR system

Current deliverables in the QMR system

- QMR1
- DDP (optional)
- QMR2
- GG 104 risk assessment
- Equality impact assessment
- Sustainable development and good design assessment
- Customer service assessment
- Draft document
- Change log
- Background commentary

Objectives of the enhanced deliverables

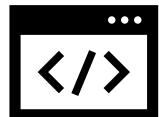

Eliminate duplication of information or content provided at the wrong stage in the process

Apply a proportionate approach to the level of documentation required

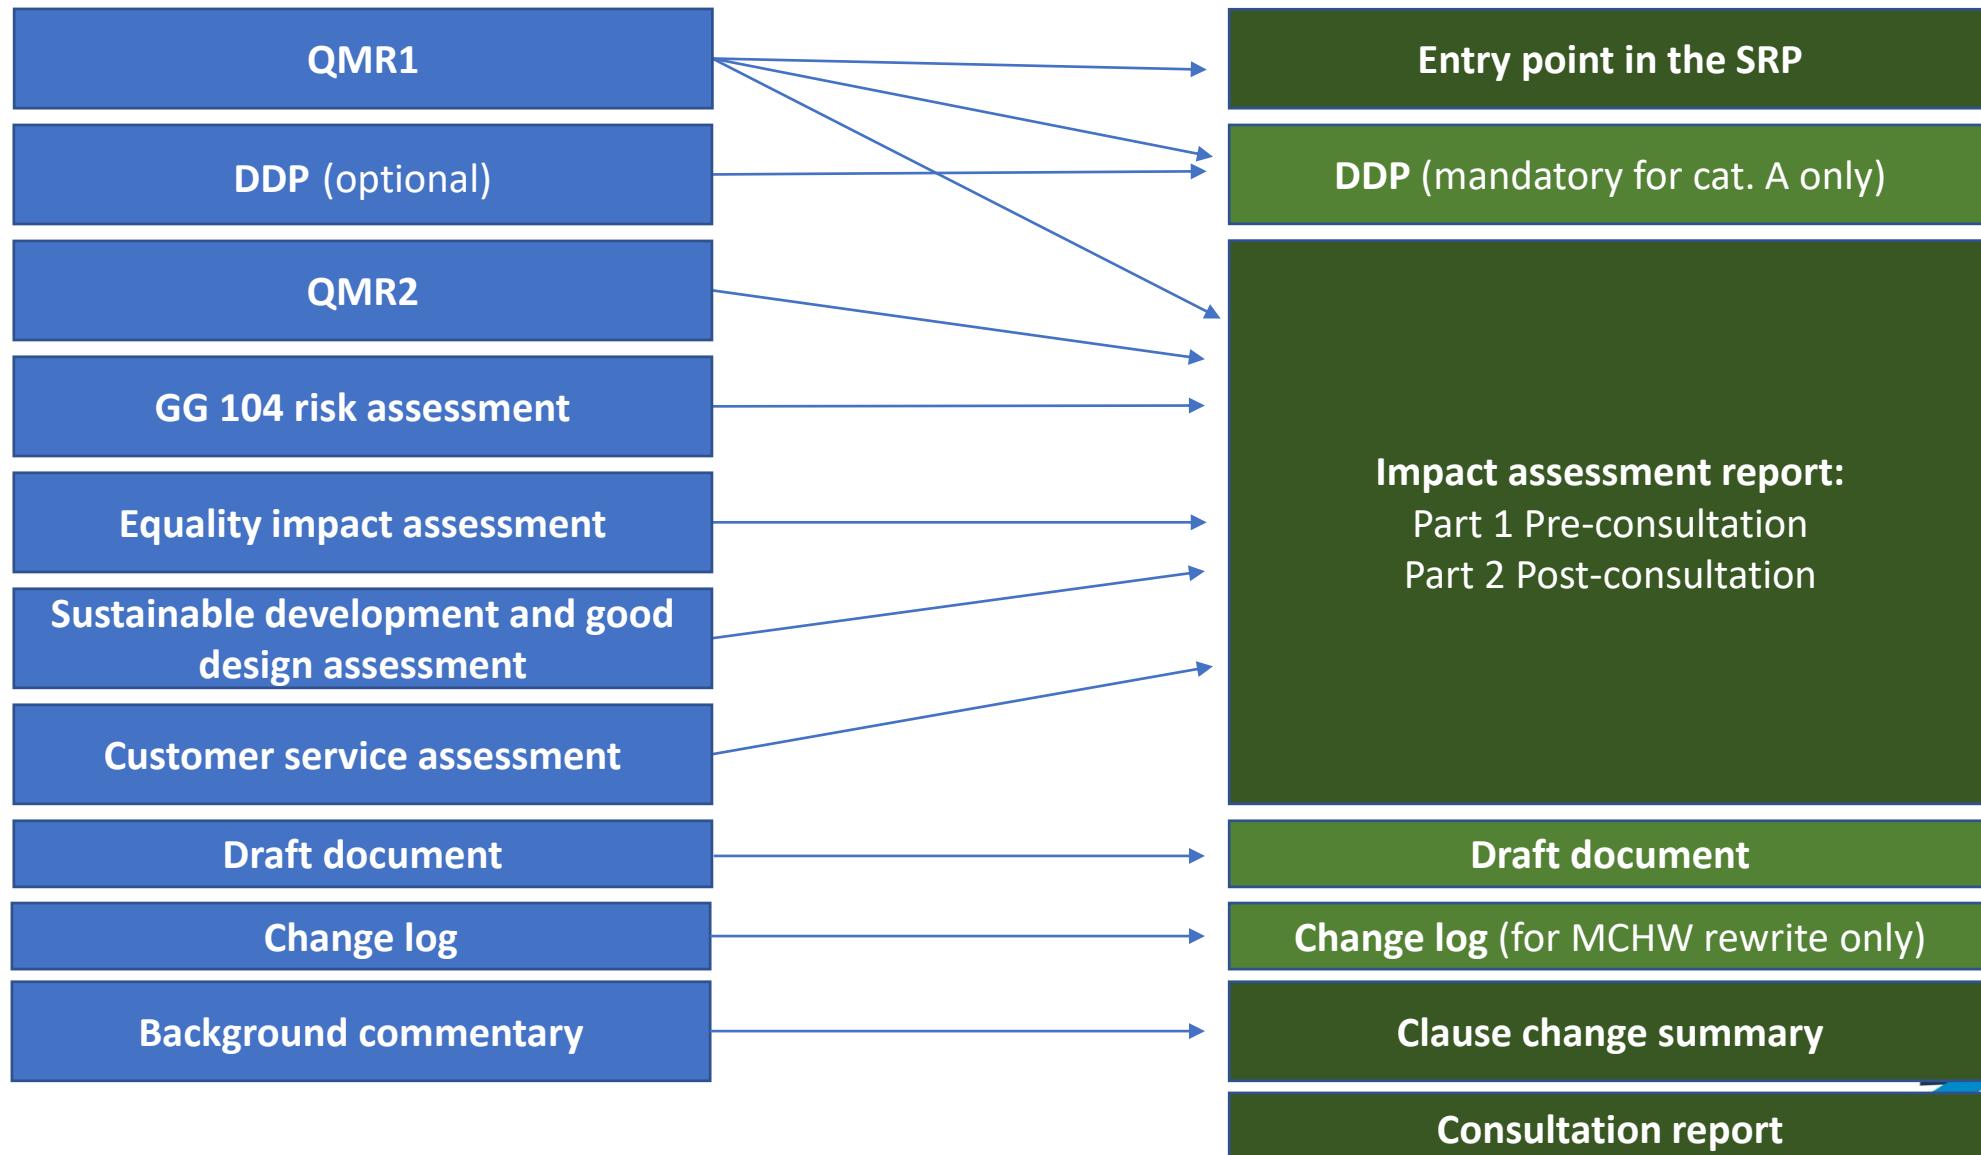

Improve commenting process and keep a complete audit trail of comments, decisions and changes made as a result of consultation

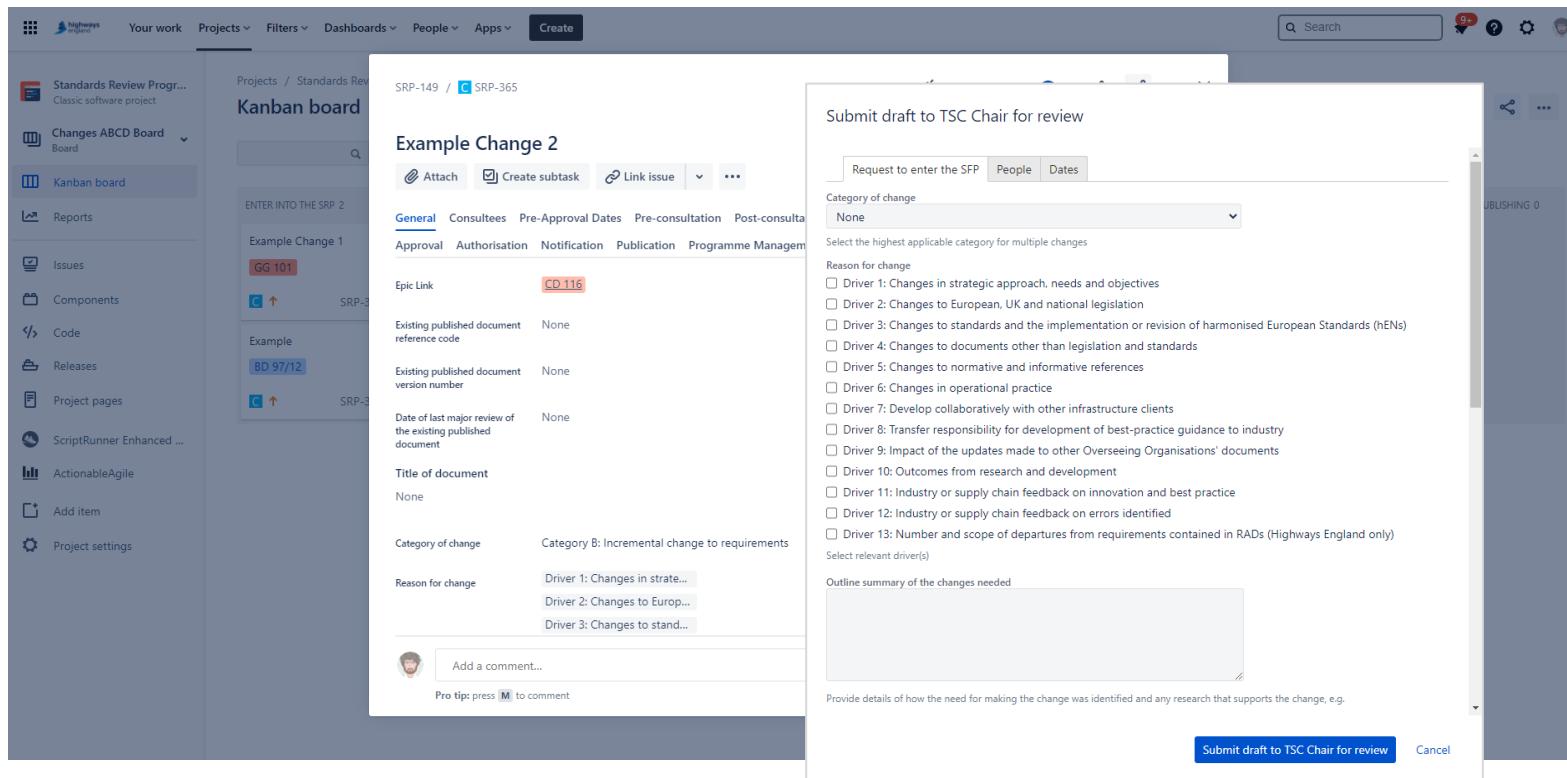

Automate production of information through the TSES where appropriate

Rationalised deliverables replacing QMR system

1. Entry point in the SRP All categories

- Item created by TAGG on request and completed by the Technical Author
- Reviewed by the TSC chair, who then submits it for addition to SRP backlog
- Assurance check undertaken by TAGG
- Separate webinar providing more details on the fields to be completed

The screenshot shows a Jira software interface. On the left, a sidebar lists various project management options like 'Kanban board', 'Issues', and 'Components'. The main area displays a 'Kanban board' for 'Example Change 2'. The board has three columns: 'ENTER INTO THE SRP 2', 'SRP-3', and 'SRP-3'. Under 'ENTER INTO THE SRP 2', there is an 'Epic Link' to 'CD 116'. Under 'SRP-3', there are two items: 'Example' and 'BD 97/12'. The 'SRP-3' column has an upward arrow. Below the board, there are tabs for 'General', 'Consultees', 'Pre-Approval Dates', 'Pre-consultation', 'Post-consultation', 'Approval', 'Authorisation', 'Notification', 'Publication', and 'Programme Management'. A 'Create' button is at the top right. A 'Submit draft to TSC Chair for review' modal window is open in the center. It has tabs for 'Request to enter the SFP', 'People', and 'Dates'. The 'Category of change' dropdown is set to 'None'. The 'Reason for change' dropdown lists 13 drivers, with 'Driver 1: Changes in strategic approach, needs and objectives' selected. The 'Outline summary of the changes needed' text area is empty. A 'Submit draft to TSC Chair for review' button is at the bottom of the modal.

2. Document Development Plan (DDP) Cat. A only

DOCUMENT DEVELOPMENT PLAN

1. BASIC INFORMATION

DOCUMENT(S) TO BE DEVELOPED (new documents)	
DOCUMENT(S) TO BE UPDATED (existing documents)	
CARS LINK TO PUBLISHED DOCUMENT	
KEY MILESTONE DATES	
Initial consultation and development strategy meeting: Start drafting: Start TSC consultation: End TSC consultation: QMR final submission:	
INTERMEDIATE MILESTONE DATES (RECOMMENDED)	x% sections agreed with the Content Specialist: The % depends on the size of the document

DOCUMENT DEVELOPMENT PLAN

3. DELIVERABLES

For DMRB documents:

- Draft updated XXXX to replace XXXX / Draft new RAD XXXX
- Draft National Application Annex, if needed
- Background document to accompany draft
- Change log for XXXX (existing documents only)
- QMR consultation report and impact assessment report
- Other deliverables as required from the work package

For Manual for Contract Documents for Highways Works (MCHW) documents:

- SHW document XXXX (replacing XXXX) and associated Instructions for Specifiers, works specific inputs template, drafts of associated changes to Volume 3 drawings, and all other amendments required to implement the specification amendments
- Draft Nationally Determined Requirements or Sections, if needed
- Draft new DMRB document(s) or new / updated clauses for existing DMRB documents to provide design information currently within the Notes for Guidance, if needed
- Background document to accompany drafts
- Change log for XXXX (existing documents only)
- Validation of contractor requirements - a link shall be established between contractor requirements and related verification and documentation requirements for validation purposes. An online tool in CARS will be made available to link related requirements and facilitate validation.
- QMR consultation report and impact assessment report
- Other deliverables as required from the work package

DOCUMENT DEVELOPMENT PLAN

4. SUMMARY OF DRAFTING NEEDS AND APPROACH

Initial consultation and development strategy meeting

- Stakeholders involved
- Outcome

Drafting needs

Provide an outline of drafting needs including as relevant the following:

- Needs of the document: <***>
- Compliance with the MDD.
- Draft in a style that will reduce the need for departures from requirements.
- Redraft in a style that will reduce contractual ambiguity.
- Editorial updates: <***> details provided in section 6
- Technical updates: <***> details provided in section 6

Departures analysis (for existing documents)

Relevant aspects to cover:

- No. of departures received
- Classification of departures, e.g. for innovation, aspects not covered, etc.
- Plan to reduce unnecessary departures and support innovation
- Any other relevant information

If you are a user of DAS, details of departures can be downloaded from the system in an excel format. We suggest filtering your search by discipline to streamline your results. A video tutorial is available via the DAS help pages and at this link:
https://www.youtube.com/watch?v=X4TpifySNQk&list=PL0Z2ueJ-KDyP9RKIFH7jN1sCjil0DF_r&index=5

Should you need any further assistance, please contact departures@highwaysengland.co.uk

4. Change log (for MCHW review programme only – RIS 2 commitment)

- For documents to be reviewed in MCHW update programme, technical authors shall produce a change log in CARS to record the changes made.
- For internal use only and will be used to briefly identify the type of change and the reason behind it as well as the location of the clause when moved for easy future retrieval.

The screenshot shows the CARS interface for a document titled 'Published document: BD 36/92 - Evaluation of whole-life costs for design and maintenance of highway bridges and structures'. The left sidebar contains a table of contents with sections like 1. INTRODUCTION, 2. SIMPLE DISTRIBUTION ME..., 3. ASSESSMENT OF MASONR..., 4. ALTERNATIVE METHODS T..., 5. SPANDREL WALLS AND DRY-ST..., 6. SUB-STRUCTURES, FOUNDATIO..., 7. JACK ARCH BRIDGES, 8. METAL BRIDGES, 9. TROUGH DECK BRIDGES, 10. REFERENCES, ANNEX A, ANNEX B, ANNEX C, ANNEX D, ANNEX E, ANNEX F, ANNEX G, and ANNEX H. The main content area shows the '1. INTRODUCTION' section, which includes a general description of the advice note's purpose and scope. To the right, a 'Foreword' section is displayed, containing publishing information, contractual and legal considerations, and a note about the document's form. Below the main content, a 'Change' table is shown, listing a single change made to the 'Foreword' section. The change details that users are responsible for applying all appropriate documents applicable to their contract, with a change type of 'Editorial' and a comment of 'Test'. The table has columns for 'Outcome Document/Section', 'Excerpt', and 'Change'.

GG 104 risk assessment

IMPACT ASSESSMENT REPORT

1.1 Impact on health, safety and wellbeing

The following GG 104 health and safety risk assessment is applicable to:

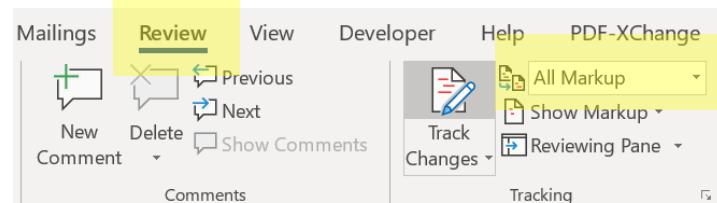

- “editorial change and changes to notes”, when updating the RAD to the correct layout and style, addressing typos and changing content in notes;
- “requirement and advice update”, when changing requirement(s) and advice of the RAD;
- “new requirement”, when introducing new requirement(s) in the RAD;
- “new RAD”, when developing a new RAD.

Please comment on the effects of the RAD on health and safety (including the CDM Regulations) and other needs of all road users, including pedestrians, protected groups and highway workers.

1.1.1 Safety risk assessment planning process

```
graph TD; A[Safety Risk Assessment Planning] --> B[Categorisation of activity type]; B --> C[Identification of affected populations]; C --> D[Safety risk assessment scope]; D --> E[Safety baseline and safety objective]
```

Item	Response
1. Type of change:	
1a When dealing with change to existing RAD, please describe what the changes to the RAD, their extent and the reasons prompted their introduction.	Click or tap here to enter text.
1b When dealing with a new RAD, please describe the content of the new RAD and the reasons prompted its introduction.	Click or tap here to enter text.

IMPACT ASSESSMENT REPORT

Item	Response
2. Please categorise the activity in Type A, B, C using GG 104, Table 2.	Choose an item.
3. Does the Divisional Director agree with the categorisation? If so, please document it.	Choose an item. Click or tap here to enter text.
4. Please clarify which road populations will or may be affected by the activity and how.	Choose an item. Click or tap here to enter text.
5. Please identify the scope of the risk assessment.	Choose an item. Click or tap here to enter text.
6. When dealing with editorial changes only:	
6a Please establish the current baseline for safety, in either qualitative or quantitative values, for each of the populations affected.	Click or tap here to enter text.
6b Please indicate any known issues identified in the application of the existing RAD that may or will have an impact on safety and provide an explanation as to whether these are being dealt with by this revision or will be dealt with at a later planned time.	Click or tap here to enter text. Click or tap here to enter text.
6c Please identify / record a time for completing this review.	Click or tap here to enter text.
7. When dealing with requirement(s) update and/or new requirement(s):	
7a Please establish the current baseline for safety, in either qualitative or quantitative values, for each of the populations affected.	Click or tap here to enter text.
7b Please provide an explanation of the impact of the requirement being changed / new requirement and its interaction with the other clauses.	Click or tap here to enter text.
7c Please identify / record a time for completing this review.	Click or tap here to enter text.
8. When dealing with a new RAD:	
8a Please establish the baseline for safety, in either qualitative or quantitative values, for each of the populations affected.	Click or tap here to enter text.
8b Please provide an explanation of the impact of the RAD and its interaction with other RADs and procedures.	Click or tap here to enter text.
8c Please identify / record a time for completing this review.	Click or tap here to enter text.
9. Please clarify the safety objective for this change / new requirement / new RAD for each population affected.	Click or tap here to enter text.

Mariapia Angelino
Be aware that Type B and type C categories require a Safety Control Review Group (SCRG). It is acceptable for Technical Standards Committee (TSC) members to also be SCRG members. However, the two functions are separate, and each has its own requirements, see the MDD Part 1 and the National Design Control Regulation (NDCR) SCRG remit and Terms of Reference (TOR). Also Management Arrangement of Safety Risk for Highways England Activities and we have an easy step by step guide to GG104 as well. [See by Step Guide to SRA](#)

Mariapia Angelino
This is the people who are or can be affected by the application of the RAD, see also GG 104 Table 1.3.

Mariapia Angelino
This should address the scope of the health and safety risk assessment based on the changes made to the RAD or the content of the new RAD.

Mariapia Angelino
The safety baseline is the level of safety against which the safety objectives are set and measured (e.g. currently we work in this way and now we will be working in that way; what is the difference and how will that difference affect safety for anyone we owe a responsibility to). In such a case, the baseline is aligned to the existing application of the RAD. The explanation of the choice of baseline should be recorded.

Mariapia Angelino
The safety baseline is the level of safety against which the safety objectives are set and measured. In such a case, the baseline is aligned to the existing application of the RAD, but an explanation is needed on the impact of the requirement being changed / new requirement, and its interaction with the other clauses. The explanation of the choice of baseline should be recorded.

Mariapia Angelino
The safety baseline is the level of safety against which the safety objectives are set and measured. The explanation of the choice of baseline should be recorded.

Mariapia Angelino
A safety objective is a statement describing what contribution, if any, a change / new requirement / new RAD will deliver from a safety perspective.

Instructions to populate the template

Equality, diversity and inclusion

IMPACT ASSESSMENT REPORT

1.2 Equality, diversity and inclusion impact

All technical authors shall complete the equality impact assessment (EgIA) screening in Part 1.

Where the screening indicate that an equality impact assessment is needed, relevant sections of Part 2 shall be completed.

Part 1: Screening

For some documents the questions below will be straightforward to answer, while in other cases there may be significant uncertainty. If in doubt, enter "uncertain" – this is relevant in 1.2.2 when explaining the judgement on the need to gather further evidence to reach an informed decision via EgIA.

A1: Outline the aims, purpose and expected outcomes of the practice/policy.

Click or tap here to enter text.

A2: Identify the customers, staff or stakeholders involved or affected.

Click or tap here to enter text.

IMPACT ASSESSMENT REPORT

Part 2: Full Equality Impact Assessment

To complete if needed, based on the decision made in the screening part.

D1: The level of impact on protected characteristics gauged from available information, research, consultation		
Equality Group (Protected Characteristics)	Impact	Summary of reasons and evidence sources (data research and consultation) supporting this analysis
Sex	Choose an item.	
Religion or Belief	Choose an item.	
Age	Choose an item.	
Disability	Choose an item.	
Race	Choose an item.	
Sexual Orientation	Choose an item.	
Gender Reassignment (Incl. Transsexual and Transgender)	Choose an item.	
Pregnancy & Maternity	Choose an item.	
Marriage & Civil Partnership	Choose an item.	

D2: Any potential risks to equality identified - Including insufficient information to make robust decisions?

Choose an item.

Identified risks:

-
-
-
-
-

E: Choose appropriate option

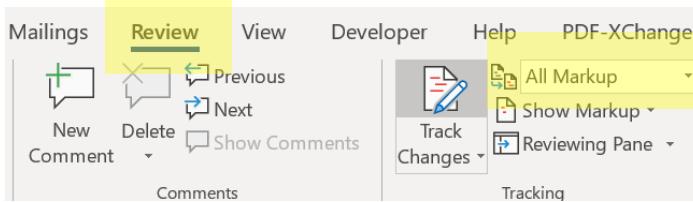

Choose an item.

Notes:

Options 1 to 3: There are no unjustified negative impacts and the policy/practice is compliant in terms of the equality duty.

Option 4: Opportunities were identified to advance equality, foster good relations and prevent discrimination. Ensure further evidence is gathered to ensure any barriers are removed and referenced in Sections F and G.

IMPACT ASSESSMENT REPORT

1.6 Other impacts

Please complete the table below as relevant.

Implications	Clarify if it is relevant or not	Detailed response if relevant
Policy implications	Choose an item.	Click or tap here to enter text.
Legal implications	Choose an item.	Click or tap here to enter text.
Implications for existing contracts and schemes, including DBFO	Choose an item.	Click or tap here to enter text.
Implications for construction	Choose an item.	Click or tap here to enter text.
Maintenance implications	Choose an item.	Click or tap here to enter text.
Implications for lifespan of assets	Choose an item.	Click or tap here to enter text.
Implications for quality systems	Choose an item.	Click or tap here to enter text.
Other implications	Choose an item.	Click or tap here to enter text.

Mariapia Angellino
Please identify how the changes made are in line with current policies (giving references) or give details of any modification to current documents that will be implemented by publication of the RAD. Where relevant, reference shall be made to TAGG and other indicators, such as those in the Highways England Business Plan and Corporate Plan, as well as any cost, service or intangible benefits.

Mariapia Angellino
Please give details of any legal implications associated with the introduction of the document, any consultation with **DLA** Legal Division or other legal experts and any outcome from such consultation.

Mariapia Angellino
Please outline the impact that the RAD will have on existing contracts and schemes, on how it might be implemented, including details if the introduction of the RAD is likely to result in delays to schemes in the pipeline. Please consult with Procurement Directorate regarding the document's use in differing forms of procurement (e.g. NEC, DBFO, etc.). Please give details of the extent of variations needed to the RAD to make it work with different forms of contract.

Mariapia Angellino
Please outline the effect that implementation of the RAD will have on the construction of works. For example, **NEC** of more efficient, effective practices and materials in design and construction leading to reduced costs and better value.

Mariapia Angellino
Please consider maintenance implications including but not exclusively relating to the safety of maintenance operatives in connection with **CDM** Regulations and current guidance for traffic management (refer to **GD 304 Designing health and safety into maintenance**). Please give advice on the application of the new RAD to maintaining existing works.

Mariapia Angellino
Consideration of increase of asset lifespan leading to economic benefits

Mariapia Angellino
Please give details of any effects the RAD is likely to have on existing Quality Management Systems including those of **CDMP** and confirm and **QMP** consultations with **CDMP** Quality Managers. Please confirm that **QMP** pages associated with use of the new document have been drafted and agreed with the appropriate directorates as necessary

Mariapia Angellino
Please give details of any other implications, e.g. where requirements of European **EN** Standards (**EN**) are considered to lead to a reduction in standards.

Changes to legislation: There are outstanding changes not yet made by the legislation.gov.uk editorial team to Climate Change Act 2008. Any changes that have already been made by the team appear in the content and are referenced with annotations. (See end of Document for details) View outstanding changes

Climate Change Act 2008

2008 CHAPTER 27

An Act to set a target for the year 2050 for the reduction of targeted greenhouse gas emissions; to provide for a system of carbon budgeting; to establish a Committee on Climate Change; to confer powers to establish trading schemes for the purpose of limiting greenhouse gas emissions or encouraging activities that reduce such emissions or remove greenhouse gas from the atmosphere; to make provision about adaptation to climate change; to confer powers to make schemes for providing financial incentives to produce less domestic waste and to recycle more of what is produced; to make provision about the collection of household waste; to confer powers to make provision about charging for single use carrier bags; to amend the provisions of the Energy Act 2004 about renewable transport fuel obligations; to make provision about carbon emissions reduction targets; to make other provision about climate change; and for connected purposes. 9 [26th November 2008]

BE IT ENACTED by the Queen's most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same, as follows:—

PART 1

CARBON TARGET AND BUDGETING

The target for 2050

1 The target for 2050

(1) It is the duty of the Secretary of State to ensure that the net UK carbon account for the year 2050 is at least [100%] lower than the 1990 baseline.

(2) "The 1990 baseline" means the aggregate amount of—

Carbon, sustainable development and good design

Carbon footprint of construction and maintenance

- Construction and maintenance carbon footprint of around 1.2 million tCO₂e/yr
- By specifying lower carbon / longer life materials and sustainable construction processes we can cut carbon
- A full training module will be made available to technical authors soon – relevant to DMRB and MCHW clause drafting

Carbon assessment

IMPACT ASSESSMENT REPORT

1.3 Impact on carbon management, sustainable development and good design

All technical authors shall complete the screening in Part 1a and 1b.

Where the screening indicate that a carbon or sustainable development / good design assessment is needed, relevant sections of Part 2 shall be completed.

CARBON MANAGEMENT

Part 1a: Screening

GG 103 requires the minimisation of greenhouse gas emissions associated with the whole life of a project. This means that all projects consider greenhouse gases across all elements of design, construction, operation and use, and decommissioning. Part 1a of this assessment considers the type of document and whether further assessment is appropriate.

Does the document specify design elements?

Does the document specify a material or product?

Does the document set out a process for assessment or review?

If yes proceed to Part 2a. Review industry best practice and apply the carbon management hierarchy.

If yes, is lifecycle carbon data available, for example in an Environmental Product Declaration available or is data in the ICE database?

If not, can product supplier provide a narrative on carbon performance of product throughout lifecycle?

If yes proceed to Part 2a. If no, proceed with document but consider R&D opportunities to develop future alternatives and document in "outcome of screening"

IMPACT ASSESSMENT REPORT

Select the appropriate outcome of the Carbon Assessment Screening

Choose an item.

Part 2a: Full assessment

The carbon management hierarchy:

- Build nothing: Is the asset / design element really needed? Could the same outcome be achieved safely and cost effectively without the asset / design element or via an alternative approach?
- Build Less: consider the potential for re-using assets / design elements or refurbishing / reducing the amount of materials used by the asset / design element.
- Build clever: Can low carbon solutions / technologies / materials be integrated into design to reduce carbon in construction, operation or use?
- Build efficiently: Can construction or maintenance practice be changed to reduce energy or materials consumption?

1. Is the RAD the appropriate place to address issues or is there a related RAD which will address this? Select relevant response.

Choose an item.

2. If the answer to 1. is that there is a more appropriate RAD to address some of the issues, state document number and title.

Document number: Click or tap here to enter text.
Document title: Click or tap here to enter text.

3. What elements of the standard are considered in this further assessment?
You do not need to do a line by line assessment, rather focus on the core themes of the RAD or the categories of materials specified

Click or tap here to enter text.

4. Were there elements of the standards that are not considered further? Can you summarise why they are not considered further?
For example, there may be elements that have no carbon impact.

Click or tap here to enter text.

5. What are the opportunities to include requirements for designing or specifying assets / elements as high up the carbon management hierarchy as possible?
For materials and products (for example in MCHW specifications) consider

Click or tap here to enter text.

Carbon management hierarchy

There may be wider sustainability and good design benefits from applying this hierarchy

Tips for completing the carbon assessment

- Screen first – you may not need to assess
- Keep the narrative brief
- Only focus on relevant issues – if it is better to deal with something in a different RAD say so
- Talk to suppliers – how are they demonstrating carbon reduction?
- If Environmental Product Declarations / life cycle data available, are there certain categories of the same material that offer lower embodied carbon?
- Can a clause be constructed to allow better carbon performance across the lifecycle?

Sustainable development and good design

IMPACT ASSESSMENT REPORT

SUSTAINABLE DEVELOPMENT AND GOOD DESIGN

Part 1b: Screening

The table below provides questions to establish the potential relevance of sustainable development (SD) and good design to the RAD. Please note both potential positive and negative aspects should be included. Where examples are given, this should not be taken as an exhaustive list of the potential relevance of the RAD to the SD goal or design principle.

The screening checklist makes use of simple yes / no / uncertain questions. For some documents these questions will be straightforward to answer, while in other cases there may be significant uncertainty. If in doubt, enter "uncertain" and describe the uncertainty in 1.3.2.

Further information on the topics covered is available via the following links:
Environment: <http://share/Share/lisapi.dll?func=ll&objId=52018695&objAction=browse>
Sustainable Development and Design:
<http://share/sharedav/nodes/35750210/Tier%20Zero%20Second%20click.docx>

Would the subject of the RAD be of significant relevance to / make a significant difference to the following sustainable development goals?	Response
SD Goal 1: Improve the health, safety and wellbeing of those affected by road infrastructure	Choose an item.
For example, relevance could be affected by significant increases or decreases in noise generated by vehicles or through impacts on the potential for the network or adjacent communities to be flooded.	
SD Goal 2: Improve land, water and air quality	Choose an item.
For example, a document may change the likelihood of soil contamination, or cause changes to surface water drainage resulting in potential pollution. Significant changes in emissions from customer vehicles might also affect the achievement of this goal.	
SD Goal 3: Support a sustainable economy	Choose an item.
For example, this goal could be positively impacted through facilitating opportunities for more sustainable development or through providing for the movement of people to places of work. Or it might be negatively affected by increasing the likelihood of severance between communities.	
SD Goal 4: Represent good 'whole life' value across the design life of road infrastructure	Choose an item.
For example, a document might affect the ability to deliver good value for money through easy to maintain and long-life road infrastructure.	
SD Goal 5: Embrace innovation	Choose an item.

highways england

IMPACT ASSESSMENT REPORT

Part 2b: Full assessment

To complete if needed, based on the decision made in the screening.

8. Which goal(s)/principle(s) in 1.3.1 are screened in? Select all relevant.

SD Goal 1
 SD Goal 2
 SD Goal 3
 SD Goal 4
 SD Goal 5
 SD Goal 6
 SD Goal 7
 SD Goal 8
 SD Goal 9
 SD Goal 10
 SD Goal 11
 SD Goal 12
 makes roads safe and useful
 is inclusive
 makes roads understandable
 fits in context
 is restrained
 is environmentally sustainable
 is thorough
 is innovative
 is collaborative
 is long-lasting

9. Is the RAD the appropriate place to address issues or is there a related RAD which will address this? Select relevant response.

10. If the answer to 2. is that there is a more appropriate RAD to address some of the issues, state document number and title.

Document number: Click or tap here to enter text.
Document title: Click or tap here to enter text.

11. Was further reading or research needed to understand the potential significant issues or uncertainties?

Choose an item.

While the SD goals focus on a range of impacts, like air and climate, the visual aspects are particularly important in the design principles

Tips for completing the sustainability assessment

- Screen first – you may not need to assess
- Focus on most relevant Sustainable Development (SD) Goals and Design Principles
- Keep the narrative concise
- Verify impacts with background research / evidence where possible
- Environmental Product Declarations or life cycle assessments can be helpful for some sustainability goals
- Seek to enhance the positive and minimise the negative

NEW TEMPLATES
Carbon assessment
Customer satisfaction
Innovation

New customer satisfaction template

- New template applies to the four Overseeing Organisations.
- Highways England's Customer service strategy used to identify high level aspects to be addressed in the impact assessment report

New customer satisfaction template

1.4 Impact on customer satisfaction

Requirements within the RADs shall enable the development of solutions to improve customer satisfaction.

The impact on customer satisfaction includes all stages from design through to construction, maintenance and decommissioning.

1.4.1 Impact assessment on customer satisfaction

Please identify and record in the table below how the implementation of new RADs / changes made to existing RADs impact on customer satisfaction of road users, road workers and others affected by the Overseeing Organisation's motorway and all-purpose trunk roads.

The table below is set around the Highways England's Customer Service Strategy.

Questions	Response	Provide evidence /examples to validate the response
<p>1. Does the implementation of the RAD / updated clauses assist in empowering the users of the standard to deliver great experiences to our customers?</p> <p>The RAD / updated clauses should support everyone in the Overseeing Organisations and supply chain to understand how they can improve customer experience and empower them to make better decisions for our customers.</p>	Choose an item.	Click or tap here to enter text.
<p>2. Does the implementation of the RAD / updated clauses result in a better relationship with our customers, communities and stakeholders?</p> <p><i>[This question is most relevant to customer service standards and operational documents]</i></p> <p>The RAD / updated clauses should enable relationships to be built with our customers, communities and stakeholders to provide a better understanding of who we are, what we do, and demonstrates that we listen to them to understand what they want and need.</p>		
<p>3. Does the implementation of the RAD / updated clauses provide a well maintained and safer network for our customers?</p> <p>The RAD / updated clauses should consider how our network and assets are designed, built, maintained, operated and decommissioned to reduce disruption and help our customers feel safe.</p>		
<p>4. Does the implementation of the RAD / updated clauses provide a better information provision for our customer?</p> <p>The RAD / updated clauses should facilitate improved information to customers, so customers will be better informed and have trust in the information they access, ensuring that they feel safe and in control of their journeys</p>		
<p>5. Does the implementation of the RAD / updated clauses provide a better end to end experience for our customer?</p> <p>The RAD / updated clauses should ensure our customers will trust that we care about their journeys, as they travel seamlessly across our network, using varying modes of transport and linking to local roads.</p>		
<p>6. Does the implementation of the RAD / updated clauses improve journey times for the customer?</p> <p>The RAD / updated clauses should contribute to making journeys take the time that customers expect them to, as we manage road works, incidents and delays to enable safe and stress-free journeys.</p>		

Tips to populate the customer satisfaction template (1/2)

Questions	Response	Aspects to be considered by technical authors when providing evidence
<p>1. Does the implementation of the RAD / updated clauses assist in empowering the users of the standard to deliver great experiences to our customers?</p> <p>The RAD / updated clauses should support everyone in the Overseeing Organisations and supply chain to understand how they can improve customer experience and empower them to make better decisions for our customers.</p>	Choose an item.	Does the RAD assist users who are customer facing? Does the RAD empower the user to make decisions which impact on customers? Does the RAD make the users role more customer focussed? Does the RAD make the user more aware of customer needs and expectations?
<p>2. Does the implementation of the RAD / updated clauses result in a better relationship with our customers, communities and stakeholders?</p> <p><i>[This question is most relevant to customer service standards and operational documents]</i></p> <p>The RAD / updated clauses should enable relationships to be built with our customers, communities and stakeholders to provide a better understanding of who we are, what we do, and demonstrates that we listen to them to understand what they want and need.</p>	Choose an item.	Does the RAD build awareness of who the Overseeing organisation is and what they do? Will the implementation of the RAD enhance travel behaviour when needed? Does the RAD identify how the customer is being listened to? Does the RAD support the development of better roadside facilities? Does the RAD provide a positive legacy for communities?
<p>3. Does the implementation of the RAD / updated clauses provide a well maintained and safer network for our customers?</p> <p>The RAD / updated clauses should consider how our network and assets are designed, built, maintained, operated and decommissioned to reduce disruption and help our customers feel safe.</p>	Choose an item.	Does the RAD identify how the OO designs, maintains or operates the network to deliver a service to meet customers' needs and expectations? Does the RAD identify programmes of work to maintain performance of the network? Does the RAD identify how the latest technology and intelligence-led maintenance is being embraced? Does the RAD identify how the network is being proactively maintained?

Tips to populate the customer satisfaction template (2/2)

<p>4. Does the implementation of the RAD / updated clauses provide a better information provision for our customer?</p> <p>The RAD / updated clauses should facilitate improved information to customers, so customers will be better informed and have trust in the information they access, ensuring that they feel safe and in control of their journeys</p>	Choose an item.	Does the RAD identify how improvements signs and signals ensure displayed information is helpful and appropriate to network conditions? Does the RAD identify how information is provided to the meet the customer needs to make them feel safe and in control of their journeys? Does the RAD assist in the development of technological advances (e.g. in-vehicle information) to provide better information to customers? Does the RAD assist in the provision of improved accuracy of information (e.g. notification of works starting, benefits of the roadworks in reducing disruption)?
<p>5. Does the implementation of the RAD / updated clauses provide a better end to end experience for our customer?</p> <p>The RAD / updated clauses should ensure our customers will trust that we care about their journeys, as they travel seamlessly across our network, using varying modes of transport and linking to local roads.</p>	Choose an item.	Does the RAD assist in improving ways of working with adjacent authorities where networks interact? Does the RAD assist in providing enhanced integration with other transport parties to facilitate better travel choices? Does the RAD assist in the provision of better signing for diversion routes? Does the RAD assist in working with roadside services and motorway service operators to improve signing identifying where and what facilities are available, in particular to disabled customers?
<p>6. Does the implementation of the RAD / updated clauses improve journey times for the customer?</p> <p>The RAD / updated clauses should contribute to making journeys take the time that customers expect them to, as we manage road works, incidents and delays to enable safe and stress-free journeys.</p>	Choose an item.	Does the RAD assist in proactively managing incidents and congestion to prevent them occurring? Does the RAD assist in the clearing of incidents to minimise impact on journey times? Does the RAD identify the use of technology to provide a better awareness of the network and share better information to the customer? Does the RAD assist in being more flexible to roadworks (e.g. length, duration) based on location and traffic flows to improve customer experience? Does the RAD assist in identifying the least disruptive options when works are to be undertaken?

Example: CS 125 - Inspection of traffic signs

Questions	Response	Provide evidence /examples to validate the response
1. Does the implementation of the RAD / updated clauses assist in empowering the users of the standard to deliver great experiences to our customers?	No	This RAD is for the inspection of permanent signs and does not include requirements for customer facing users
2. Does the implementation of the RAD / updated clauses result in a better relationship with our customers, communities and stakeholders? <i>[This question is most relevant to customer service standards and operational documents]</i>	No	This RAD is for the inspection of permanent signs and does not directly enable relationships to be built. Although the findings of the inspections will lead to works which are visible to the customer.
3. Does the implementation of the RAD / updated clauses provide a well maintained and safer network for our customers?	Yes	Adhering to the requirements of this RAD will ensure that maintenance works are identified to ensure the network is safe for the customer.
4. Does the implementation of the RAD / updated clauses provide a better information provision for our customer?	Yes	This RAD provides the requirements to carry out inspections on traffic signs to ensure maintenance works are carried out provide the information to meet customers' needs
5. Does the implementation of the RAD / updated clauses provide a better end to end experience for our customer?	No	This RAD is for the inspection of permanent signs and does not impact directly onto customers utilising other modes of transport.
6. Does the implementation of the RAD / updated clauses improve journey times for the customer?	No	This RAD provides guidance on the inspection of permanent traffic signs and do not assist in the management of roadworks or incidents.

Innovation

1.7 Innovation

Please complete the table below as relevant.

Please state any opportunities of innovation that can be realised implementing this RAD / new or updated clauses.

Click or tap here to enter text.

Challenge standards

— to enable innovation and drive efficiencies.

The Challenge

The safety of the transport users and those who work on the infrastructure is paramount and standards help us achieve this. Standards provide a framework and the ability to manage safety and technical risks in the design, construction and operation of transport infrastructure. Standards prevent short-term imperatives from resulting in longer-term operational cost or unacceptable asset performance. However, whilst standards must address our core statutory, regulatory and performance requirements, they should not stifle innovation or efficiency. The supply chain should be supported to develop new solutions and not held back in terms of innovation by historical norms.

Source: 2017 Transport Infrastructure Efficiency Strategy

Factors affecting innovation through standards development

Factors affecting innovation through standards development include:

- Setting clear outcomes and balancing effectively method-based and performance-based requirements
- Keeping standards up to date and codifying existing technology to create 'demand pull' for new practices and technology
- Imposing requirements that force the industry to develop new solutions to comply with them (consider trends in the construction industry)

Introduction

Background

The Design Manual for Roads and Bridges (DMRB) is a suite of documents which contains requirements and advice relating to works on motorway and all-purpose trunk roads for which one of the Overseeing Organisations is highway or road authority.

The DMRB embodies the collective experience of the Overseeing Organisations, their agents, supply chain members and industry bodies. It provides requirements and advice resulting from research, practical experience of constructing and operating motorway and all-purpose trunk roads, and from delivering compliance to legislative requirements.

Assumptions made in the preparation of the DMRB

Competence

The DMRB has been prepared for use by competent practitioners, typically qualified professionals able to work independently in relevant fields, who are expected to apply their own skill and judgement when making decisions involving the information that the DMRB contains.

Link with regulation and legislation

DMRB documents are not statutory or regulatory documents or training manuals, neither do they cover every point in exhaustive detail.

In general, the DMRB does not duplicate National, UK and European legislative requirements. Anyone engaged in works on or relating to the Overseeing Organisations' motorway and all-purpose trunk roads is assumed to understand and comply with the relevant legislation.

Link with the MCHW

The requirements and advice given in DMRB documents are provided on the basis that the works are constructed in accordance with the Manual of Contract Documents for Highway Works (MCHW).

Verbal forms

The verb 'must' indicates a statutory or legislative requirement.

All Unresolved Resolved Raised by me Version: Live

Filter comments by version:

Raised by [REDACTED] Raised on: Aug 30 2019 09:43

GENERAL 201907 TPB ...

'should' comply with legislation is a contradiction of terms. This is also a note type paragraph. Perhaps change to 'needs' to be more neutral.

Resolved by [REDACTED] Resolved on: Sep 24 2019 09:41

In general we mean legislation as it applies to the reader, that is why it is a recommendation.

In the documents, we focus on what the reader has to do to ensure we comply with the legislation as it applies to us (HE & DA's) by making those obligations into requirements.

This discussion has been resolved.

Approach to online course delivery

Introduction	
Session 1: Overview of the new Standards Governance Process	1
Session 2: Categories of change A/B/C/D	
Session 3: Enhanced governance steps	
<i>break</i>	15 min
Session 4: Enhanced deliverables replacing QMR system	2
<i>break</i>	15 min
Session 5: New consultation process replacing the TPB	
Session 6: Key responsibilities of technical authors	3
Session 7: Key updates to Jira and CARS	
Conclusions and next steps	

Session 5: New consultation process replacing the TPB

Objectives of the new consultation process

Maximise the value of the time given by those engaging with document development, incentivise attendance

Ensure that input from stakeholders is timely

Ensure that content is reviewed for technical correctness and acceptability and avoid documents that are not aligned strategically

Technical Standards Committee (TSC)

- Technical Project Boards (TPB) renamed to “Technical Standards Committee” (TSC).
- One TSC established for each discipline.

TSC disciplines

1. Asset information
2. Control and communication technology
3. Customer experience
4. Drainage
5. Geotechnics
6. Governance
7. Health, safety and wellbeing
8. Operations and road works
9. Pavements
10. Road layout
11. Road lighting
12. Smart roads
13. Structures
14. Sustainability and environment

Consultees and informed parties

- Clarification of TSC membership with distinction made between:
 - Editorial consultees
 - Technical consultees
 - Concurrence consultees (essential and additional)
- Distinction also made between consultees and informed parties.

Stakeholder	Who	A. Policy Change / Rewrite / New document development	B. Change to requirement	C. Change to advice	D. Changes to notes and spelling mistakes
Technical Author	Technical specialist within an Overseeing Organisation	Responsible	Responsible	Responsible	Responsible
TSC chair	Leads the TSC	Accountable	Accountable	Accountable	Accountable
Editorial consultees	TAGG Content Specialist	Consulted	Consulted	Consulted	Consulted
Technical consultees	Technical specialists within SES and wider stakeholders for the subject area and interfacing aspects, including Devolved administrations' technical leads	Consulted	Consulted	Consulted	Informed
Concurrence consultees (essential)	<ul style="list-style-type: none">• TAGG• Major Projects• Operations• Commercial and Procurement• Health and safety• Equality, diversity and inclusion• Sustainable development and good design• Customer experience	Consulted	Consulted	Consulted	Informed
Concurrence consultees (additional)	<ul style="list-style-type: none">• Members from other SES Directorate.• Highways England Legal• Highways England IT• Highways England Asset management• Other Specialists (e.g. risk, BEIS, Financial Services, Asset Advisors Group)	Consulted	Consulted	Consulted	Informed
Additional informed parties	<ul style="list-style-type: none">• DfT, DfT Legal, H&S Executive and other governmental and quasi-governmental bodies• National Police Chiefs Council (NPCC)• Local government associations• Outside bodies (trade bodies, industry associations, professional institutions, etc.)• Expert (individual) independent advisors	Informed	Informed	Informed	Informed

Consultation period (1/2)

- The consultation period is the period where a document is made available to the TSC for commenting, not the entire review process.
 - It excludes peer review, post-consultation review of comments, potential future consultations

Major revision		Incremental change		
	A. Policy Change / Rewrite / New document development	B. Change to requirement	C. Change to advice	D. Changes to notes and spelling mistakes
Recommended consultation periods	On a case by cases basis Indicative time is 6 weeks	4 weeks	4 weeks	2 weeks

- TSC chair to agree and record the deadline at the start of the process. Extensions can be granted as agreed with the TSC chair.

Consultation period (2/2)

- TSC chair to send advance notice of the consultation to all TSC members.
- All consultees expected to communicate leave / absences / other commitments to the TSC Chair in a timely manner.
- TSC chair to monitor potential delays using preferred approach.
- Consultation periods need to be monitored to identify any blockers and put in place relevant mitigation measures.

Approvers and authorisers

- Approval by TSC chair, Heads of Standards and Divisional Directors (cat. A only)
- Authorisation by Chief Highways / Roads Engineers (or delegated staff)

Stakeholder	Who	Major revision	Incremental change		
		A. Policy Change / Rewrite / New document development	B. Change to requirement	C. Change to advice	D. Changes to notes and spelling mistakes

New MDD Part 1 v6.0

Steps to enter the SRP backlog

Steps for drafting category A changes

Key responsibilities of the technical author

From MDD Part 1

Technical author	<ol style="list-style-type: none">1. Manage and maintain RADs through proactively planning a programme of document development and reviews in their respective practice areas based on relevant drivers for change.2. Fill in relevant information in Jira to enter the SRP backlog, including proposed category of change (A,B,C,D).3. Liaise with the TSC chair for the relevant discipline from the inception of the development work through to the TSC chair approval.4. Liaise with the content specialists to ensure the RAD is MDD compliant.5. Deliver high-quality documents, i.e. document development plan (for category of change A only), draft document / clauses, impact assessment report and consultation report in accordance with the MDD rules, based on his / her technical experience and expertise and on the outcome of the TSC consultation.6. Address comments received during the TSC consultation process and identify areas that can need future work.7. Attend the sign-off meeting to brief the HE's Chief Highways Engineer regarding the RAD and respond to any questions that the CHE raises.8. Liaise with TAGG notification experts to address any comments received from European Commission.9. Answer any queries from TAGG publication team during the publication process.	Planning
		Completing Jira form
		Liaise with TSC chair
		Liaise with content specialists
		Deliver high-quality documents
		Address comments received

Approach to online course delivery

Introduction	
Session 1: Overview of the new Standards Governance Process	1
Session 2: Categories of change A/B/C/D	
Session 3: Enhanced governance steps	
<i>break</i>	15 min
Session 4: Enhanced deliverables replacing QMR system	2
<i>break</i>	15 min
Session 5: New consultation process replacing the TPB	
Session 6: Key responsibilities of technical authors	
Session 7: Key updates to Jira and CARS	3
Conclusions and next steps	

Session 7: Key updates to Jira and CARS

In this section

- Provide an overview of changes within Jira and CARS that support the new Standards Governance Process – for awareness
- Highlight the key aspects relevant to your role

Key updates to Jira

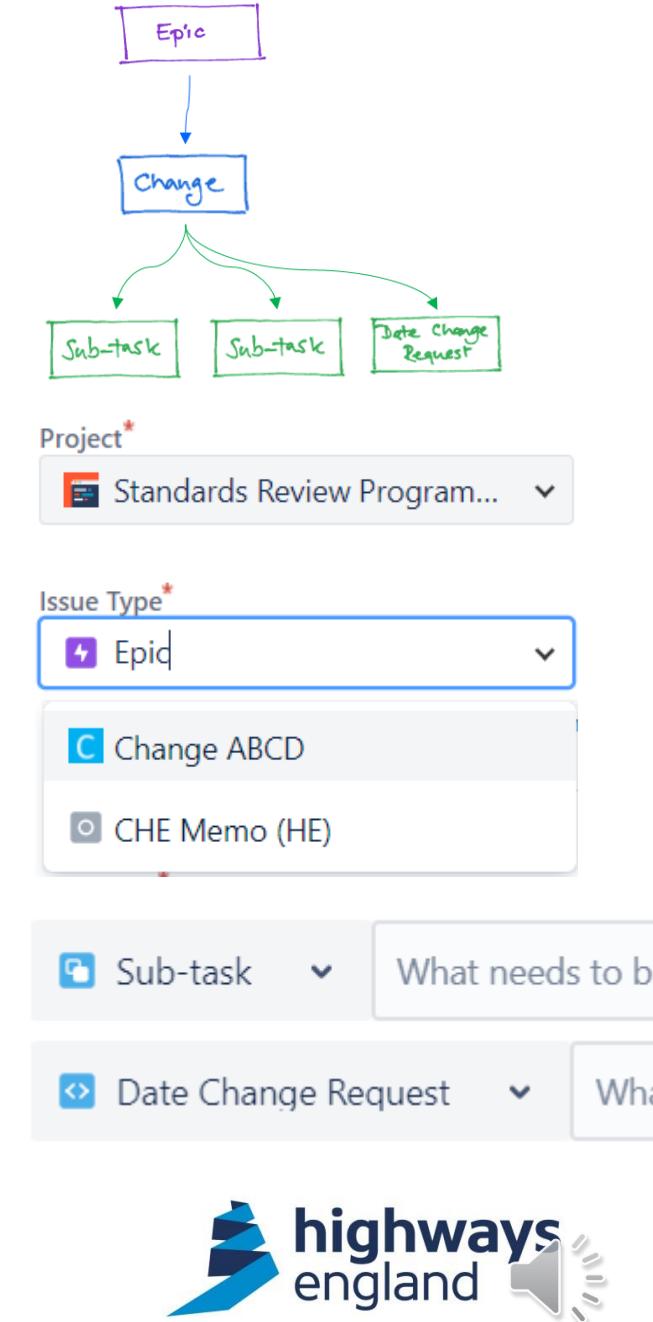

- Becky will send you a separate training video on how to use Jira in your role as Technical Author
- The training will:
 - present how to access Jira
 - present the new Jira interface and related terminology
 - ‘Epics’ and ‘Change ABCD’ issues and related Kanban boards
 - present how to find documents in the new Standards Review Programme (SRP) replacing the Standards Forward Programme (SFP)
 - present how to create and complete a ‘Change ABCD’ issue
 - explain the link between Jira, SharePoint and CARS to manage new governance deliverables, and
 - give final remarks and contact details

Standards Review Programme

- New project: Standards Review Programme (SRP)
- New item types and workflows:
 - **Epic** (Document) – represents a document within either the DMRB or MCHW – created and managed by TAGG
 - **Change ABCD** – represents a change to documents
 - **Sub-task** – created within a Change ABCD to logically break up work required
 - **Date Change Request** – created within a Change ABCD to request forecast date changes within the review programme

Key Technical Author Takeaways:

- SFP will become SRP
- New Jira structure; Change ABCD is the main workflow

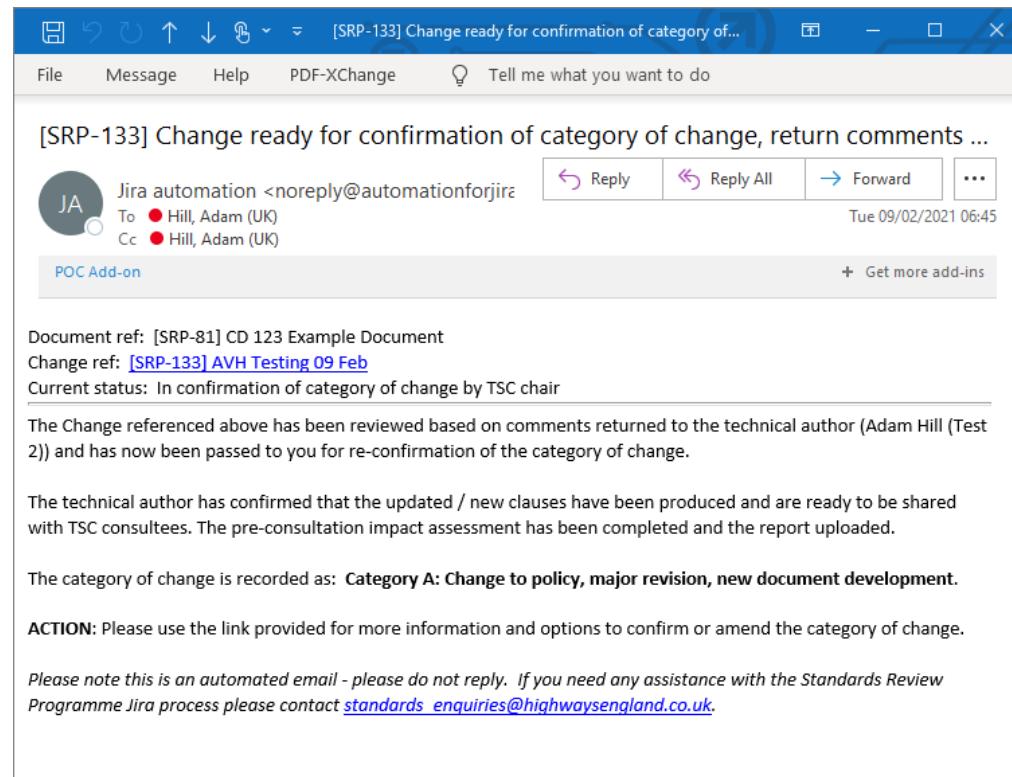

Improved Notifications

Key Technical Author Takeaways:

- Notifications clearly outline what action needs to be taken

- Default Jira notifications have been replaced with emails designed for each stage of the workflow, providing targeted information and clear guidance on what actions need to be undertaken

} NB: All emails will come from 'Jira automation'

} Standard information block at the top of every email

} Concise summary of what has been done

} Clear action on what needs to be done next

} Support contact details provided on every email

New boards

- New Kanban boards:
 - **Epics Board**
 - New | Published | Withdrawn
 - **Change ABCD Board**
 - Enter into the SRP
 - Document Development Plan
 - Drafting
 - In Confirmation of Category of Change
 - Consultation
 - In Approval
 - In Authorisation
 - Notification and Publishing

Key Technical Author Takeaways:

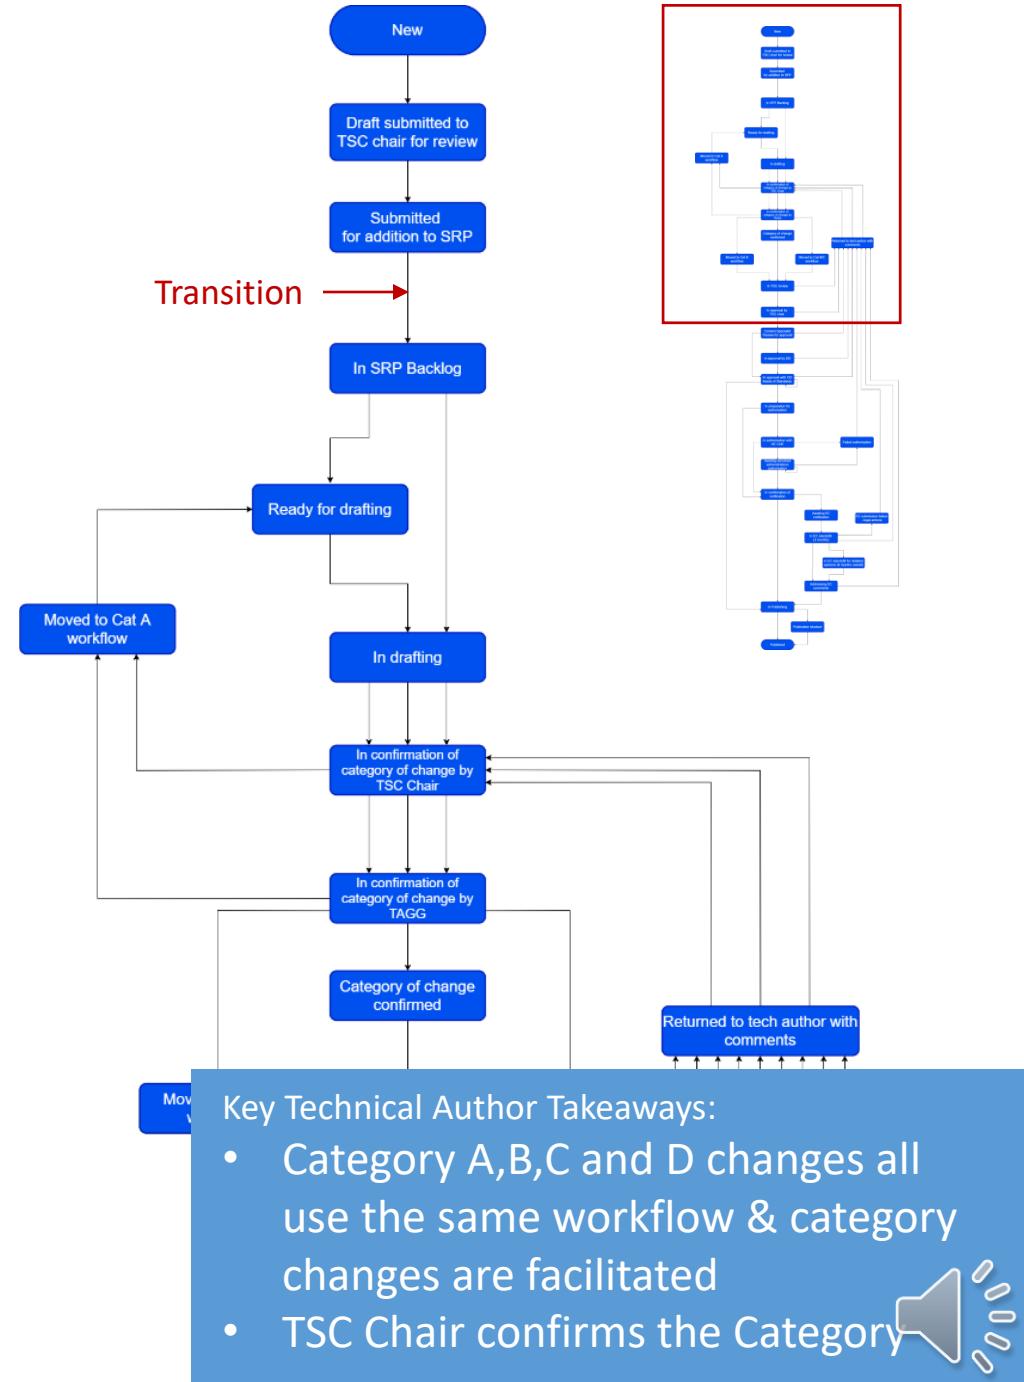

- TSC filters available on both Change ABCD & Epic Boards

CONSULTATION			
IN APPROVAL			
IN AUTHORISATION			
NOTIFICATION AND PUBLISHING			

Change ABCD (1 of 3)

- Item created by TAGG on request
 - Refer back to [Entry point in the SRP](#)
- Workflow
 - Applicable for all Categories of Change
 - Category of change is confirmed at key stages of the process
 - **‘Transitions’** used to progress through the workflow
 - **Permissions** used to restrict who can run each transition (SRP Admins can run all)
 - **Validation stops** the workflow progressing if the required information is not provided
 - **Comments** are mandatory where applicable
 - Selected information is automatically cleared if the Change is **‘Returned to the technical author with comments’**
 - ensuring it is re-entered during subsequent submission for approval and authorisation.

Change ABCD (2 of 3)

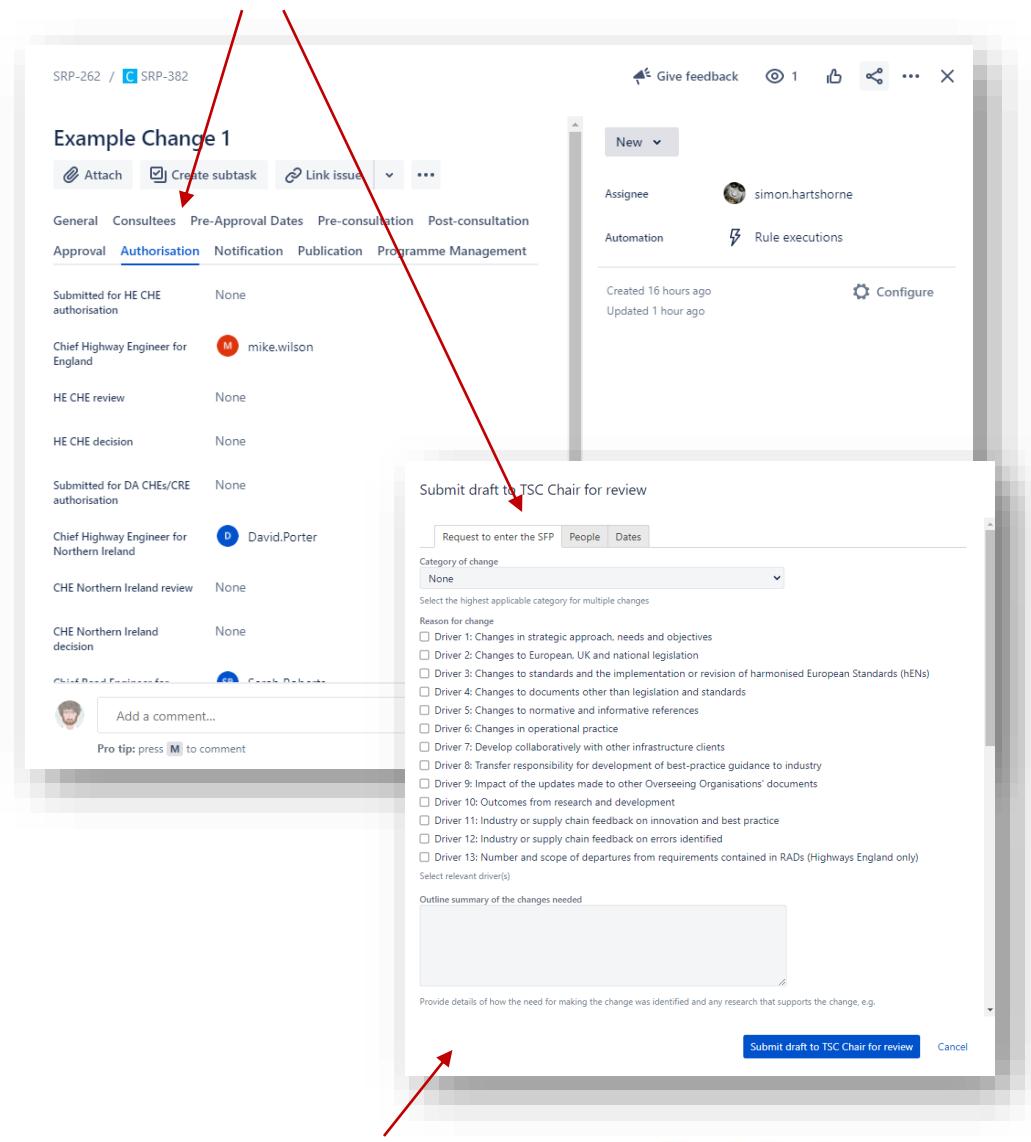

Views

- SRP Project uses the new Jira view
 - Email sent by Becky Axtell on 25 Feb
- Tabs are used to group information
- All fields are read only and are set via transition screens
- Closed questions used wherever possible to ensure data quality and aid reporting
- People fields are limited to relevant user lists where applicable
- Default values are provided where applicable

Key Technical Author Takeaways:

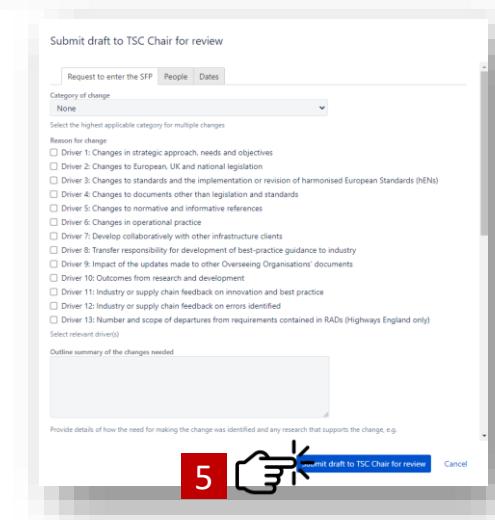

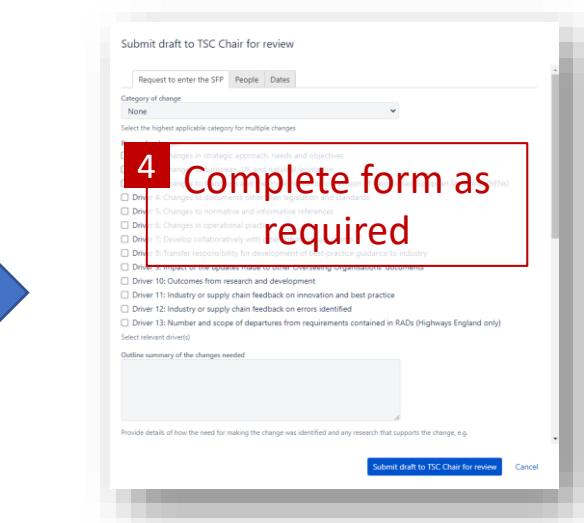

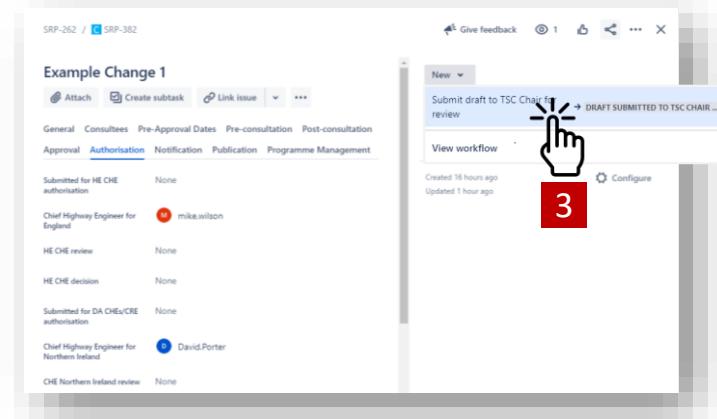

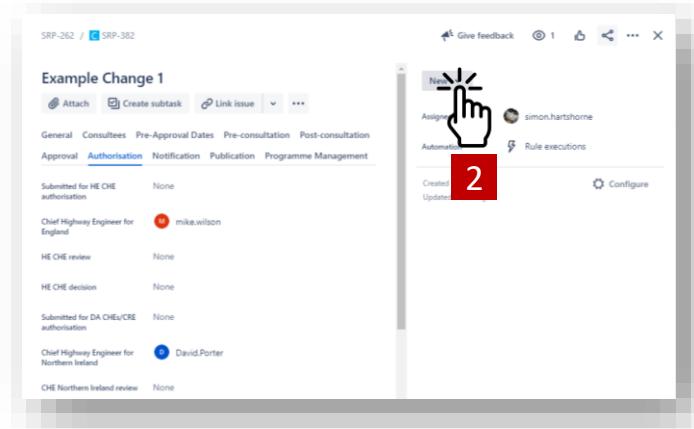

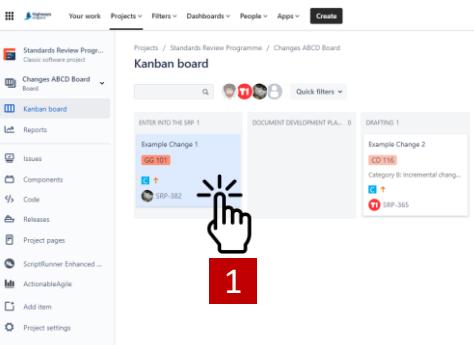

- All information is available for review, but only updatable via transitions
- TAGG can correct errors if required

Tabs used to group information

Change ABCD (3 of 3)

- To progress a Change ABCD item:

Key Technical Author Takeaways:

- All your actions are managed through transitions
- Using transitions is intuitive

Date Change Request

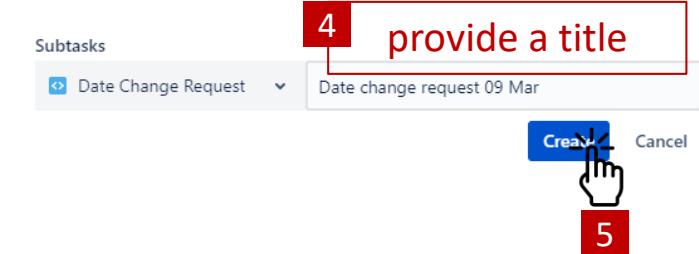

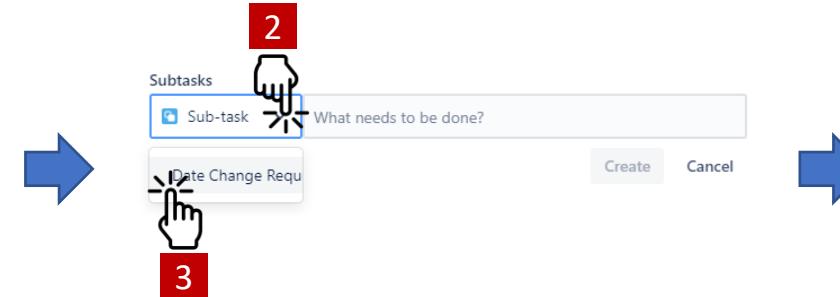

Key Technical Author Takeaways:

- A simple process is available to update forecast dates in the programme

- For use when forecast programme dates need to be modified
- From within the Change ABCD item, create a new Date Change Request

SRP-262 / C SRP-382

Example Change 1

6 Complete form as required

Issue Type: Date Change Request

Summary: Date change request 09 Mar

Description: Give a brief description of the nature of new requirements or the technical changes to existing requirements.

TSES Information management strategy

- Jira is used to capture and record programme and approval / authorisation details
- The evidence/justification for document change is captured in the new, rationalised documentation and stored in SharePoint
- CARS is still used to capture comments on documents as they are developed

The image displays two screenshots of a SharePoint library interface. The top screenshot shows a 'Consultation report template' with a 'Modified' date of 5 days ago and 'Modified By' as 'Adell, Rebecca'. The bottom screenshot shows a list of 'All templates' with 15 items, each with a 'Modified' date and 'Modified By' as 'Adell, Rebecca'. The disciplines listed are: All templates, Asset information discipline, Control and comme technology discipline, Customer experience discipline, Drainage discipline, Geotechnics discipline, Governance discipline, Health, safety and wellbeing discipline, Operations and road works discipline, Pavements discipline, Road layout discipline, Road lighting discipline, Smart roads discipline, Structures discipline, and Sustainability and environment discipline.

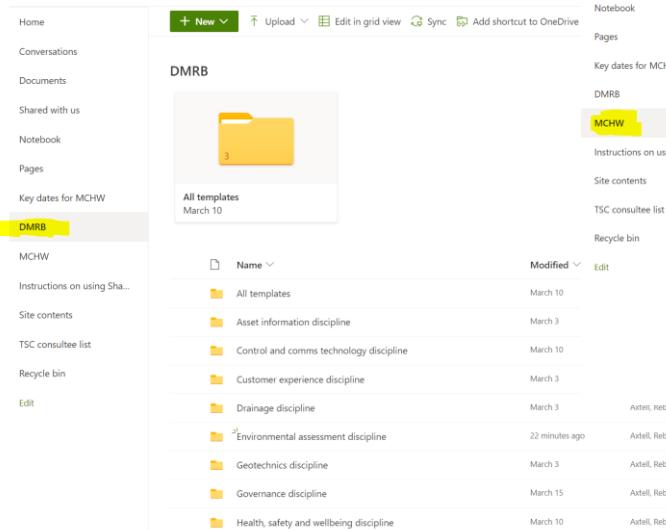

Name	Modified	Modified By
All templates	5 days ago	Adell, Rebecca
Asset information discipline	March 3	Adell, Rebecca
Control and comme technology discipline	5 days ago	Adell, Rebecca
Customer experience discipline	March 3	Adell, Rebecca
Drainage discipline	March 3	Adell, Rebecca
Geotechnics discipline	March 3	Adell, Rebecca
Governance discipline	A few seconds ago	Adell, Rebecca
Health, safety and wellbeing discipline	5 days ago	Adell, Rebecca
Operations and road works discipline	5 days ago	Adell, Rebecca
Pavements discipline	March 3	Adell, Rebecca
Road layout discipline	March 3	Adell, Rebecca
Road lighting discipline	March 3	Adell, Rebecca
Smart roads discipline	March 3	Adell, Rebecca
Structures discipline	March 3	Adell, Rebecca
Sustainability and environment discipline	2 minutes ago	Adell, Rebecca

Key Technical Author Takeaways:

- New information management strategy for authoring teams to adhere to

SharePoint links

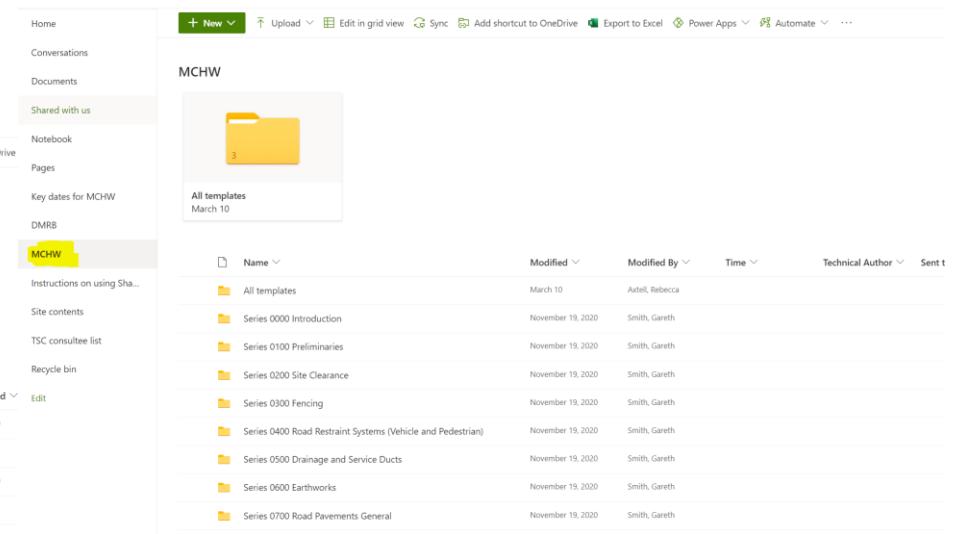

- SharePoint links provided in slide
- DMRB folders contain sub folders for each discipline and within these, folders for each document published
- MCHW folders contain sub folders for each Series

The screenshot shows a SharePoint library named 'DMRB'. The left navigation bar includes 'Home', 'Conversations', 'Documents', 'Shared with us', 'Notebook', 'Pages', 'Key dates for MCHW', 'DMRB' (which is highlighted in yellow), and 'MCHW'. The 'DMRB' section contains a folder icon labeled 'All templates' (March 10). The main content area shows a list of documents with columns for 'Name', 'Modified', 'Modified By', 'Time', 'Technical Author', and 'Sent'. The list includes:

Name	Modified	Modified By	Time	Technical Author	Sent
All templates	March 10	Axtell, Rebecca

- SharePoint folder links
- (DMRB): <https://highways.sharepoint.com/sites/UpdateoftheMCHWtrainingmaterials/DMRB/Forms/AllItems.aspx>
- (MCHW): <https://highways.sharepoint.com/sites/UpdateoftheMCHWtrainingmaterials/MCHW/Forms/AllItems.aspx>

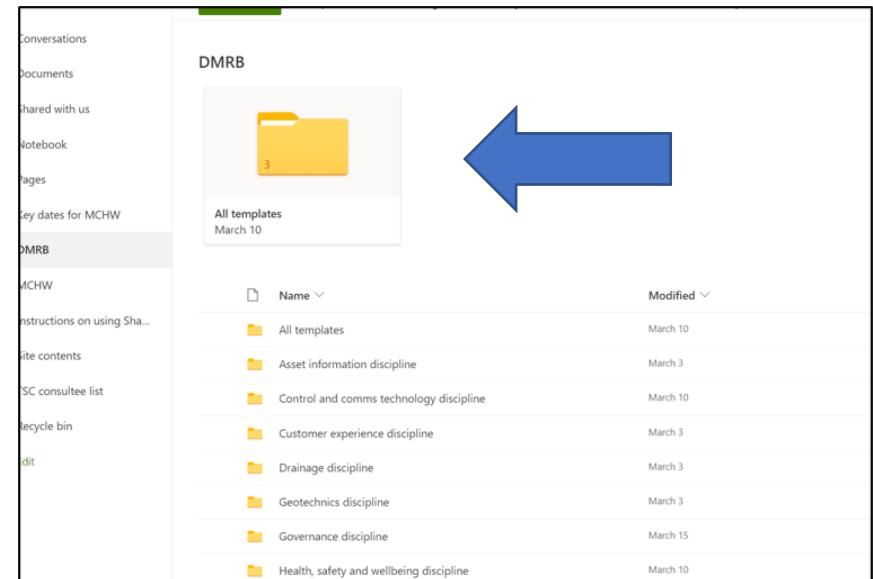

The screenshot shows a SharePoint library named 'MCHW'. The left navigation bar includes 'Home', 'Conversations', 'Documents', 'Shared with us', 'Notebook', 'Pages', 'Key dates for MCHW', 'DMRB', and 'MCHW' (which is highlighted in yellow). The 'MCHW' section contains a folder icon labeled 'All templates' (March 10). The main content area shows a list of documents with columns for 'Name', 'Modified', 'Modified By', 'Time', 'Technical Author', and 'Sent'. The list includes:

Name	Modified	Modified By	Time	Technical Author	Sent
All templates	March 10	Axtell, Rebecca			
Series 0000 Introduction	November 19, 2020	Smith, Gareth			
Series 0100 Preliminaries	November 19, 2020	Smith, Gareth			
Series 0200 Site Clearance	November 19, 2020	Smith, Gareth			
Series 0300 Fencing	November 19, 2020	Smith, Gareth			
Series 0400 Road Restraint Systems (Vehicle and Pedestrian)	November 19, 2020	Smith, Gareth			
Series 0500 Drainage and Service Ducts	November 19, 2020	Smith, Gareth			
Series 0600 Earthworks	November 19, 2020	Smith, Gareth			
Series 0700 Road Pavements General	November 19, 2020	Smith, Gareth			

SharePoint folders

- Within each high-level folder structure, you can find template documents for:
 - Document development plan (Cat A only)
 - Impact assessment report (All categories)
 - Consultation report (All categories)

Name	Modified
All templates	March 10
Asset information discipline	March 3
Control and comms technology discipline	March 10
Customer experience discipline	March 3
Drainage discipline	March 3
Geotechnics discipline	March 3
Governance discipline	March 15
Health, safety and wellbeing discipline	March 10

DMRB > All templates

Name	Modified	Modified By	+ Add column
Consultation report template	March 10	Axtell, Rebecca	
Document Development Plan template	March 10	Axtell, Rebecca	
Impact assessment report template	March 10	Axtell, Rebecca

DMRB > All templates > Impact assessment report template

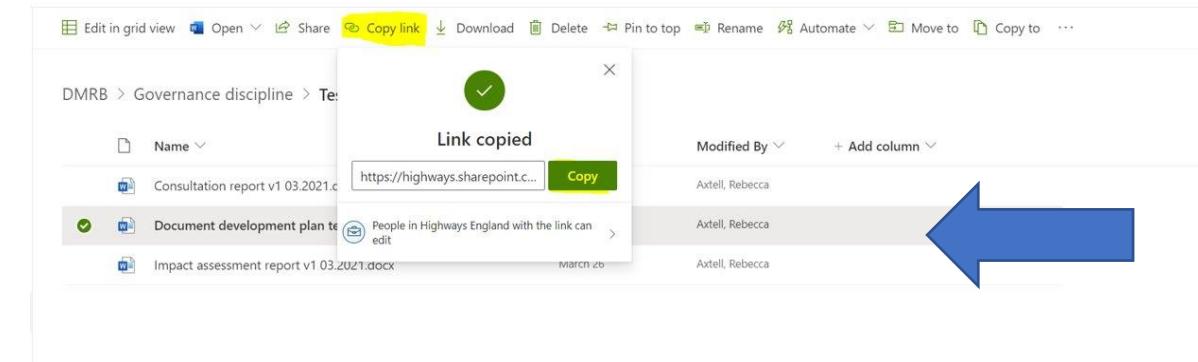

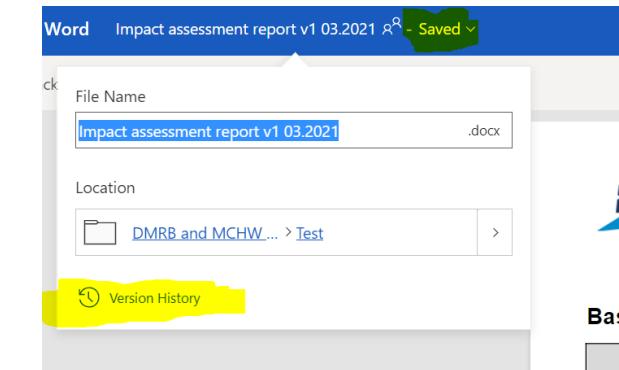

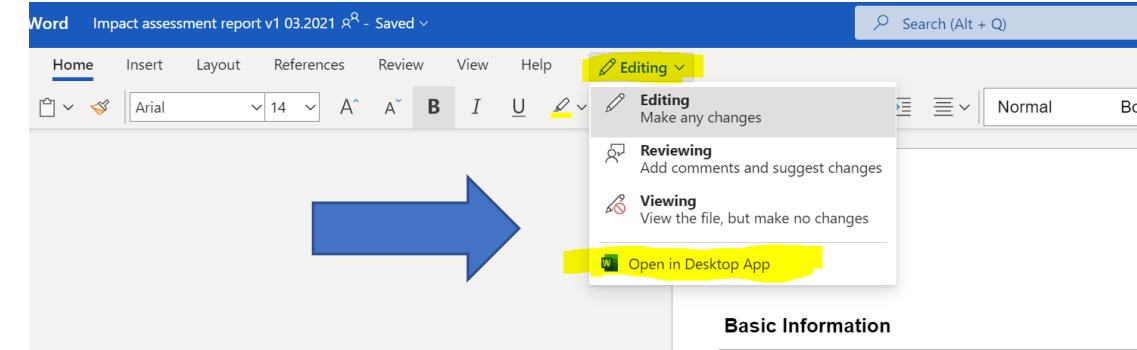

Name	Modified	Modified By	+ Add column
Impact assessment report v1 03.2021.docx	36 minutes ago	Axtell, Rebecca	

SharePoint – hints and tips

- To edit the document, press 'editing' mode and then 'open in desktop app'
 - Changes saved automatically
- To see version history, click on the document title and then 'version history'
- To add a link to Jira, press 'copy link' and copy. The link is then pasted by you into the Jira data entry form

Key Technical Author Takeaways:

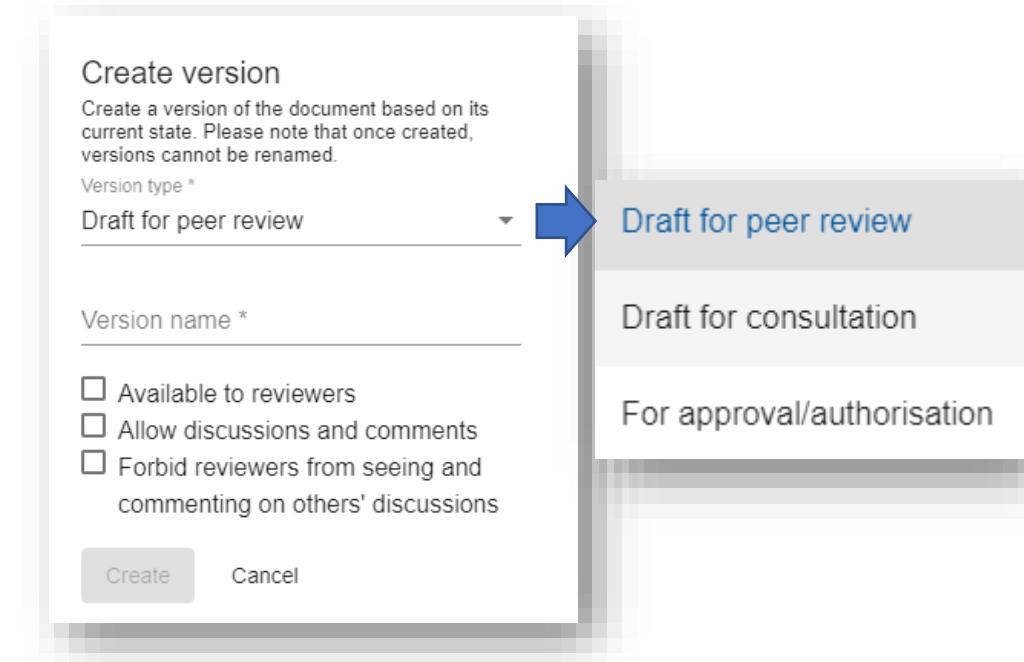

- Folders are logically structured
- The latest templates are available in the top level DMRB and MCHW folders
- Edit documents in the desktop app

Key changes to CARS

Versions

- Version types: all versions created in CARS need a defined type:
 - ‘Draft for peer review’
 - ‘Draft for consultation’
 - ‘For approval/authorisation’
- ‘For approval/authorisation’ versions lock the document from being updated
 - The lock can be removed by marking the version as either ‘Changes Required’ or ‘Published’ by TAGG
- Category of Change automatically sets the next version number

Category of Change
Category A: Change to policy, major revision, new document development ▾

Provisional next publication version number
1.0.0

Key Technical Author Takeaways:

- The version shared for review cannot be updated in CARS unless it is passed back, or published
- Version numbering is fully automated based on Category of change

Release Notes

Key Technical Author Takeaways:

- Release notes now solely relate to the current publication

- Release notes within CARS now support line returns, and the input field wraps!
- CARS also now captures the 'Documents affected by the next release'
- The format of the release notes in the PDF export for publication has been updated and now includes previous versions

Release notes for publication

These will be the publicly visible release notes on the exported PDF and DMRB website; the text will correctly wrap on to a new line in this field and...
The field now supports line returns.

Documents affected by the next release

Core document, England NAA

Core document

England NAA

Clause Change Summary

- Refer back to session 4
- For use with all Categories of Change where there is a previous published document in CARS – accessible as shown alongside
- Provides a full summary of changes, compared to the last published version – see below

The screenshot shows the CARS interface with the following details:

- Header:** highways england cars, Documents > Testing MD-1451.
- Left Sidebar:** Contains a search bar, a tree view of document sections (Introduction, Norm 2 - updated, Norm 1, Appendix A. Appen...), and a '+ Create section' button.
- Main Content:** A comparison table between 'Old index' and 'New index'. The table has columns for 'Old index', 'Old clause', 'New index', 'New clause', and 'Background & commentary'.
 - Introduction:** Old clause: 'This is my first introduction paragraph.' New clause: 'This is my first introduction paragraph - Updated'.
 - Heading:** Old clause: 'This is a test heading'. New clause: 'This is a test heading'.
 - Sub Heading:** Old clause: 'My sub heading'. New clause: 'My sub heading'.
 - Table:** Shows two tables. The first table has a caption 'Some text, correctly with no Index' and an image of a flask. The second table has a caption 'Some text, correctly with no Index' and an image of a flask. Both tables have a caption 'A figure'.
 - Text:** 'A Table' with a table containing 'With some text in cells'.
 - Section:** '1. Norm 1' and '2. Norm 1'.
 - Heading:** 'Heading' and 'Sub Heading'.
 - Table:** Shows two tables. The first table has a caption 'New' and an image of a flask. The second table has a caption 'Requirement 2 - more text = moving this to Norm 1' and an image of a flask. Both tables have a caption 'Advice 1 - hello'.
 - Text:** 'New' and '2.3.1'.
 - Section:** 'Sub Heading'.
 - Table:** Shows two tables. The first table has a caption 'This is a separate heading' and an image of a flask. The second table has a caption 'This is a separate heading - Updated' and an image of a flask.
 - Text:** '1.6' and '2.7'.
 - Text:** 'A list: 1) item 1' and 'A list: 1) item 1'.

The screenshot shows a context menu with the following options:

1. Create template
2. Create version
3. Versions
4. Clause change summary (highlighted with a red box)
5. Export to PDF (highlighted with a red box)
6. Document Preview

Key Technical Author Takeaways:

- The Clause Change Summary provides the consultees with assurance of the scope of changes and is easy to generate

Summary – Jira and CARS updates

- The new SRP Jira project is used to programme manage all document updates
- The Change ABCD workflow is used for all categories of change
- The TSES Information Management Strategy sets out where supporting documents should be stored
- Version numbering is now automated based on the category of change and version management is stricter than before
- Release notes now relate to the current publication only; history is available
- Clause change summary available to provide a clear clause level record of what has been updated since the last publication

Approach to online course delivery

Introduction	
Session 1: Overview of the new Standards Governance Process	1
Session 2: Categories of change A/B/C/D	
Session 3: Enhanced governance steps	
<i>break</i>	15 min
Session 4: Enhanced deliverables replacing QMR system	2
<i>break</i>	15 min
Session 5: New consultation process replacing the TPB	
Session 6: Key responsibilities of technical authors	3
Session 7: Key updates to Jira and CARS	
Conclusions and next steps	

Conclusions and next steps

Conclusions

1. The standards governance process has been entirely reviewed and updated to address specific issues and demands.
2. Key changes include:
 - Introduction of **four categories of change A/B/C/D with enhanced governance steps** - distinction between major revisions and incremental changes, new version numbering associated to the type of change
 - **New consultation process with Technical Standards Committees (TSC)** replacing Technical Project Boards (TPB) – distinction between different categories of consultees, between consultees and informed parties, between consultees, approvers and authorisers
 - **Enhanced deliverables replacing QMR system** – entry point in Jira, DDP, draft document, change log, clause change summary, impact assessment report, consultation report
3. Technical authors play a key role in ensuring the quality of the documents produced.

Benefits of the new approach to governance

- ✓ Governance stages proportionate to the changes being introduced – no longer “one size fits all” approach
- ✓ Unnecessary / wasteful processes avoided and more robust governance
- ✓ Enable documents to be better aligned strategically across the entire business and the Devolved Administrations
- ✓ Deliverables rationalised (any duplication of information avoided) and produced at the right time in the process.
- ✓ Reduced drafting effort required to produce deliverables by automating processes where possible.
- ✓ Rationale and justification for any changes better captured in a new consultation report with a record of who was involved in decision making

Outcomes from today

- Understand the need for a new governance process and its benefits
- Understand your role in managing major revisions and incremental changes in the new governance process
- Understand how to compile the new governance deliverables
- Understand key changes to Jira and CARS and where to find additional information to use them
- Be ready to support the implementation of the new governance system

Support that will be provided for implementation

- Key components of the TSES (JIRA, CARS, Index Manager and website) updated to accommodate the proposed mandatory stages in the governance process for different types of authoring activities
- New templates developed for governance deliverables
- Training provided to TSC chairs and secretaries first, followed by training to technical authors and other relevant parties
- TAGG staff available to answer any queries
- MDD updated

Roll out of the new process

- New standards governance process (including TSC) went **live 22nd March**
- All epics in TPB review onwards continue in Standards Forward Programme (current workflow) until publication
- All epics prior to TPB review will be moved to new Standards Review Programme (SRP), (unless otherwise agreed with TAGG) and subject to new standards governance process (Categories of change A for major revision/policy, B for requirements, C for advice, and D for notes/spelling mistakes).

What you need to do now

1. Familiarise with the new standards governance process and deliverables by reviewing previous slides and the new MDD content v6.0.
2. Provide any feedback to TAGG including your experience and suggestions for improvement (see next slide on key contacts).

Key contacts

For any queries or feedback, please contact TAGG:

Kirti Surti Kirti.Surti@highwaysengland.co.uk

Becky Axtell Rebecca.Axtell@highwaysengland.co.uk

Please provide your feedback on this training session going to the link provided in the chat box.

Next steps

1. Training to other relevant parties will be delivered soon.
2. A new document maintenance process (including a structured approach to document review cycles and feedback management) will be introduced over the upcoming months.

Thank you for your attention and support
